1. Nature of operations

Massachusetts Mutual Life Insurance Company (MassMutual), a mutual life insurance company domiciled in the Commonwealth of Massachusetts, and its domestic life insurance subsidiaries domiciled in the State of Connecticut (collectively, the Company), provide individual and group life insurance, disability insurance, individual and group annuities and guaranteed interest contracts (GIC) to individual and institutional customers in all 50 states of the United States of America (U.S.), the District of Columbia and Puerto Rico. Products and services are offered primarily through the Company's MassMutual Financial Advisors (MMFA), Digital Direct to Consumer and Business to Business (DTC&B2B), Institutional Solutions (IS) and Workplace Solutions (WS) distribution channels.

MMFA is a sales force that includes financial advisors that operate in the U.S. MMFA sells individual life, individual annuities and disability insurance. The Company's DTC&B2B distribution channel sells individual life and supplemental health insurance primarily through direct response television advertising, digital media, search engine optimization and search engine marketing. The Company's IS distribution channel sells group annuities, group life and GIC primarily through retirement advisory firms, actuarial consulting firms, investment banks, insurance benefit advisors and investment management companies. The Company's WS distribution channel sells group life insurance and annuity products as well as individual life insurance, critical illness and long term care (LTC) products distributed through investment advisors.

2. Summary of significant accounting policies

a. Basis of presentation

These condensed consolidated statutory financial statements include MassMutual and its wholly-owned U.S. domiciled life insurance subsidiary C.M. Life Insurance Company (C.M. Life), and C.M. Life's wholly-owned U.S. domiciled life insurance subsidiary, MML Bay State Life Insurance Company. All intercompany transactions and balances for these consolidated entities have been eliminated. Other subsidiaries and affiliates are accounted for under the equity method in accordance with statutory accounting practices. Statutory financial statements filed with regulatory authorities are not presented on a consolidated basis.

The condensed consolidated statutory financial statements have been prepared in conformity with the statutory accounting practices of the National Association of Insurance Commissioners (NAIC) and the accounting practices prescribed or permitted by the Commonwealth of Massachusetts Division of Insurance; and for the wholly-owned U.S. domiciled life insurance subsidiaries, the State of Connecticut Insurance Department.

The condensed consolidated statutory financial statements and notes as of September 30, 2020 and December 31, 2019 and for the nine months ended September 30, 2020 and 2019 are unaudited. These condensed consolidated statutory financial statements, in the opinion of management, reflect the fair presentation of the financial position, results of operations, changes in surplus and cash flows for the interim periods. These condensed consolidated statutory financial statements and notes should be read in conjunction with the consolidated statutory financial statements as these condensed consolidated statutory financial statements disclose only significant changes from yearend 2019. The results of operations for the interim periods should not be considered indicative of results to be expected for the full year. The Condensed Consolidated Statutory Statements of Financial Position as of December 31, 2019 have been derived from the audited consolidated financial statements at that date, but do not include all of the information and footnotes required by statutory accounting practices for complete financial statements.

For the full description of accounting policies, see *Note 2*. "Summary of significant accounting policies" of Notes to Consolidated Statutory Financial Statements included in the Company's 2019 audited consolidated yearend financial statements.

b. Common stocks - subsidiaries and affiliates

Common stocks of unconsolidated subsidiaries, primarily MassMutual Holding LLC (MMHLLC), is accounted for using the statutory equity method. The Company accounts for the value of MMHLLC at its underlying U.S. GAAP equity value less an adjustment of \$137 million as of September 30, 2020 for a portion of its noncontrolling interests. Operating results, less dividends declared, for MMHLLC is reflected as net unrealized capital gains (losses) in the Statutory Statements of Changes in Surplus. Dividends declared from MMHLLC are recorded in net investment income when declared and are limited to MMHLLC's U.S. GAAP retained earnings. The cost basis of common stocks – subsidiaries and affiliates is adjusted for impairments deemed to be other than temporary.

3. New accounting standards

Adoption of new accounting standards

In June 2016, the NAIC adopted modifications to Statements of Statutory Accounting Principles (SSAP) No. 51R, *Life Contracts*, to incorporate references to the Valuation Manual and to facilitate the implementation of principles-based reserving (PBR), which were effective on January 1, 2017. The adoption of PBR only applies to new life insurance policies issued after January 1, 2017, however the Company adopted these revisions to SSAP No. 51R using the 3-year phased in approach as of January 1, 2020. Prior to adoption, the Company used formulas and assumptions to determine reserves as prescribed by state laws and regulations. Under PBR, the Company is required to hold the higher of (a) the reserve using prescribed factors and (b) the PBR reserve which considers a wide range of future economic conditions, computed using justified company experience factors, such as mortality, policyholder behavior and expenses. At the time of adoption, the modifications did not have a material effect on the Company's total life reserves and surplus in the consolidated financial statements.

In April 2019, the NAIC adopted modifications to SSAP No. 16R, *Electronic Data Processing Equipment and Software*, effective January 1, 2020, the Company elected to early adopt effective April 1, 2019. This guidance aligns and clarifies the requirements for capitalizing implementation costs incurred in a hosting arrangement that is a service contract, with the requirement for capitalizing implementation costs incurred to develop or obtain internal-use software. Costs for implementation activities in the application development stage is capitalized, depending on the nature of the costs and would be nonadmitted, while costs incurred during preliminary project or post implementation stages are expensed as incurred. The amendments also require the entity to expense the capitalized implementation costs of a hosting arrangement that is a service contract over the lesser of the expected term of the hosting arrangement or five years. The Company adopted this guidance on a prospective basis and the adoption did not have a material impact to its financial statements.

In August 2019, the NAIC adopted modifications to SSAP No. 51R, *Life Contracts*, to incorporate references to the Valuation Manual and to facilitate the implementation of PBR. The adoption, effective January 1, 2020, only applies to certain annuity products and includes inforce policies issued after 1980. Prior to adoption, the Company used formulas and assumptions to determine reserves as prescribed by state laws and regulations. Under PBR, the aggregate reserve for contracts falling within the scope of these requirements shall equal the stochastic reserve plus the additional standard projection amount less the projected interest maintenance reserve (IMR) included in the starting assets. These requirements constitute the Commissioners Annuity Reserve Valuation Method for all contracts encompassed by the scope. The modifications did not have a material effect on the Company's total annuity reserves and surplus in the consolidated financial statements.

In April 2020, the NAIC adopted modifications to SSAP Nos. 15, 22R and 86. These revisions adopt Financial Accounting Standards Board Accounting Standard Update No. 2020-04 *Reference Rate Reform*, which applies only to contracts, hedging relationships, and other transactions that reference London Inter-Bank Offered Rate (LIBOR) or another reference rate expected to be discontinued because of reference rate reform. Optional expedients allow entities (under certain circumstances) to avoid having to remeasure contracts or reassess a previous accounting determination for hedged items. The guidance is effective through December 31, 2022. The Company has adopted this guidance and the adoption did not have a material impact on its financial statements.

In April 2020, the NAIC adopted modifications to SSAP Nos. 6, 47, 51R and 65. This guidance extends the 90-Day Rule due to the impacts of COVID-19 and provides exception to the 90-day past due rule for nonadmittance required in SSAP No. 6 for premiums, SSAP No. 47 for uncollected uninsured plan receivables, SSAP No. 51R for life

premiums and SSAP No. 65 for high deductible policies. It was applicable only for the first and second quarters of 2020 and expired on September 29, 2020. The Company has adopted this guidance and the adoption did not have a material impact on its financial statements.

In April 2020, the NAIC adopted modifications to SSAP No. 36. This guidance notes a mortgage loan or bank loan modification due to the impacts of COVID-19 on the borrower will not automatically be categorized as a troubled debt restructuring (TDR). To qualify for relief, the borrower must have been in good standing as of December 31, 2019 (not more than 30 days past due). This guidance expires at the earlier of 60 days after the date of termination of the National Emergency or December 31, 2020. The Company has adopted this guidance and the adoption did not have a material impact on its financial statements.

In April 2020, the NAIC adopted modifications to SSAP Nos. 26R, 30R, 37, 43R and 48. This guidance provides limited time exceptions for impairment assessments related to mortgage loans, bank loans and other investments that predominantly invest in mortgage loans and does not require an impairment classification under SSAP No. 37 for mortgage loans or SSAP No. 26R for bank loans that are deferred/modified in response to the impacts of COVID-19. It also provides limited-scope provisions for assessing impairment for other investments (e.g., mutual funds, limited liability companies) that predominantly invest in mortgage loans impacted due to fair value declines if the entity does not intend to sell. This guidance only defers the assessment of impairment due to situations caused by the forbearance or modification of mortgage loan or bank loan payments for borrowers who are or may be unable to meet their contractual payment obligations because they are experiencing short-term financial or operational problems due to the effects of COVID-19. This guidance is only applicable for the first, second and third quarters of 2020 and will expire in the fourth quarter of 2020. The Company has adopted this guidance and the adoption did not have a material impact on its financial statements.

In May 2020, the NAIC adopted modifications to SSAP No. 34. This guidance notes if investments have been impacted by forbearance or other modification provisions, a reporting entity shall assess whether the investment income has been earned in accordance with the modified terms. This guidance was applicable for the second quarter of 2020 and it expired on September 29, 2020. The Company has adopted this guidance and the adoption did not have a material impact on its financial statements.

In May 2020, the NAIC adopted modifications to SSAP Nos. 26R, 36, 43R and 103R. This guidance clarifies how to determine when restructuring or modification of certain debt investments due to COVID-19 are a TDR. The guidance also clarifies whether a modification that is not a TDR needs to be assessed as an exchange under SSAP No. 103R. This guidance has the same end date as the Coronavirus Aid, Relief, and Economic Security (CARES) Act and is effective for the specific purpose to provide practical expedients in assessing whether modifications in response to COVID-19 are insignificant under SSAP No. 36 and in assessing whether a change is substantive under SSAP No. 103R. The Company has adopted this guidance and the adoption did not have a material impact on its financial statements.

Future adoption of new accounting standards

In July 2020, the NAIC adopted modifications to SSAP No. 26R, *Accounting for Bond Tender Offers*, effective January 1, 2021. The modifications apply similar reporting for gains or losses due to a tender offer as previously adopted for calls. The difference between consideration and par is recognized as net investment income, while any difference between book value and par is recognized as realized gain or loss. The modifications are not expected to have a material effect on the Company's consolidated financial statements.

In July 2020, the NAIC adopted modifications to SSAP No. 32, *Preferred Stock*, effective January 1, 2021. The modifications define carrying value of redeemable preferred stock as amortized cost for NAIC 1-3 designations, the lower of amortized cost or fair value for NAIC 4-6 designations, and new fair value measurement for perpetual and mandatorily convertible preferred stock. They clarify when failure to meet certain dividends or redemption payments could trigger an impairment assessment, that preferred shares issued by joint ventures are included in the scope of this guidance, and clarifies scope related to sinking fund schedules, mandatory conversions, and various other features. They also clarify fair value would be capped by any currently effective call price. The revisions would impact the Company's current unaffiliated and affiliated perpetual preferred stock investments. The modifications are not expected to have a material effect on the Company's consolidated financial statements.

4. Fair value of financial instruments

The Company reviews the fair value hierarchy classifications each reporting period. Changes in the observability of the valuation attributes and the level of market activity may result in a reclassification of certain financial assets or liabilities between fair value hierarchy classifications. Such reclassifications are reported as transfers between levels in the beginning fair value for the reporting period in which the changes occur.

The following presents changes in the Company's Level 3 assets carried at fair value:

	Gains Balance (Losses) as of in Net		osses) (Gains)						Transfers					Balance as of

Other transfers include assets that are either no longer carried at fair value, or have just begun to be carried at fair value, such as assets with no level changes but a change in the lower of cost or market carrying basis. Industrial and miscellaneous bonds in other contain assets that are now carried at fair value due to ratings changes and assets are no longer carried at fair value where the fair value is now higher than the book value. Level 3 transfers in are assets that are consistently carried at fair value but have had a level change. Common stocks unaffiliated assets were transferred from Level 2 to Level 3 due to a change in the observability of pricing inputs, at the beginning fair value for the reporting period.

5. Investments

The Company maintains a diversified investment portfolio. Investment policies limit concentration in any asset class, geographic region, industry group, economic characteristic, investment quality or individual investment.

a. Bonds

The carrying value and fair value of bonds were as follows:

	September 30, 2020													
			(Gross	C	iross								
	(Carrying	Un	realized	Unr	ealized		Fair						
		Value	(Gains	L	osses		Value

Total	\$ 10	06,023	\$	8,031	\$	295	\$ 1	13,759						

The December 31, 2019 gross unrealized losses exclude \$27 million of losses included in the carrying value. These losses include \$26 million from NAIC Class 6 bonds and \$1 million from RMBS and CMBS whose ratings were obtained from outside modelers. These losses were primarily included in industrial and miscellaneous or parent, subsidiaries and affiliates.

As of September 30, 2020, investments in structured and loan-backed securities that had unrealized losses, which were not recognized in earnings, had a fair value of \$11,154 million. Securities in an unrealized loss position for less than 12 months had a fair value of \$7,632 million and unrealized losses of \$424 million. Securities in an unrealized loss position for greater than 12 months had a fair value of \$3,522 million and unrealized losses of \$160 million. These securities were primarily categorized as industrial and miscellaneous or parent, subsidiaries and affiliates.

As of December 31, 2019, investments in structured and loan-backed securities that had unrealized losses, which were not recognized in earnings, had a fair value of \$7,822 million. Securities in an unrealized loss position for less than 12 months had a fair value of \$2,338 million and unrealized losses of \$24 million. Securities in an unrealized loss position for greater than 12 months had a fair value of \$5,484 million and unrealized losses of \$96 million. These securities were primarily categorized as industrial and miscellaneous or parent, subsidiaries and affiliates.

In the course of the Company's investment management activities, securities may be sold and reacquired within 30 days to enhance the Company's yield on its investment portfolio. The Company did not sell any securities with the NAIC Designation 3 or below for the nine months ended September 30, 2020 or 2019, that were reacquired within 30 days of the sale date.

Residential mortgage-backed exposure

RMBS are included in the U.S. government and agencies, special revenue and industrial and miscellaneous bond categories. The Alt-A category includes option adjustable-rate mortgages and the subprime category includes 'scratch and dent' or reperforming pools, high loan-to-value pools and pools where the borrowers have very impaired credit but the average loan-to-value is low, typically 70% or below. In identifying Alt-A and subprime exposure, management used a combination of qualitative and quantitative factors, including FICO scores and loan-to-value ratios.

As of September 30, 2020, RMBS had a total carrying value of \$2,819 million and a fair value of \$2,918 million, of which approximately 13%, based on carrying value, was classified as Alt-A. Alt-A and subprime RMBS had a total carrying value of \$1,058 million and a fair value of \$1,094 million. As of December 31, 2019, RMBS had a total carrying value of \$1,823 million and a fair value of \$1,939 million, of which approximately 19%, based on carrying value, was classified as Alt-A. Alt-A and subprime RMBS had a total carrying value of \$904 million and a fair value of \$969 million.

b. Common stocks - subsidiaries and affiliates

MMHLLC paid \$200 million in dividends to MassMutual for the nine months ended September 30, 2020, which were declared in 2019, and declared and paid \$300 million in dividends for the nine months ended September 30, 2019. MMHLLC declared \$66 million in dividends to MassMutual for the nine months ended September 30, 2020.

MassMutual contributed capital of \$64 million to MMHLLC for the nine months ended September 30, 2020 and \$282 million for the nine months ended September 30, 2019.

On September 30, 2020, MassMutual announced it will purchase, through an indirect, wholly owned subsidiary, an additional investment in Rothesay Holdco UK Limited (RHUK) for £1.39 billion. RHUK wholly owns Rothesay Life. The purchase will increase MassMutual's indirect ownership in Rothesay Life from 24.9% to 48.9% and is expected to close in the fourth quarter of 2020 subject to regulatory approvals.

On May 24, 2019, an indirectly wholly owned subsidiary of MassMutual, MM Asset Management Holding LLC (MMAMH) executed the sale of its retail asset management affiliate, Oppenheimer Acquisition Corp. (OAC), to Invesco Ltd (Invesco), a global asset manager. Under the terms of the sale, MMAMH and OAC employee shareholders received 81.8 million of Invesco common shares and \$4.0 billion in perpetual, non-cumulative preference shares with a fixed cash dividend rate of 5.9%. MMAMH is a directly wholly owned subsidiary of MMHLLC. In turn, at the time of the transaction, MMAMH received a 15.7% common equity interest in post transaction Invesco and MMAMH entered into a shareholder agreement pursuant to which MMAMH has customary minority shareholder rights, including the appointment of a director to Invesco's board of directors. MassMutual's investment in MMHLLC was increased from the impact of this sale through change in unrealized capital gains of \$3,361 million, with an approximate net increase to surplus of \$2,500 million.

Subsidiaries of MMHLLC are involved in litigation and investigations arising in the ordinary course of their business, which seek compensatory damages, punitive damages and equitable remedies. Although the Company is not aware of any actions or allegations that reasonably could give rise to a material adverse impact to the Company's financial position or liquidity, the outcome of litigation cannot be foreseen with certainty. It is the opinion of management that the ultimate resolution of these matters will not materially impact the Company's financial position or liquidity. However, the outcome of a particular proceeding may be material to the Company's Condensed Consolidated Statutory Statements of Changes in Surplus for a particular period depending upon, among other factors, the size of the loss and the level of the Company's changes in surplus for the period.

c. Mortgage loans

Mortgage loans are comprised of commercial mortgage loans and residential mortgage loans. The Company's commercial mortgage loans primarily finance various types of real estate properties throughout the U.S., the United Kingdom and Canada. The Company holds commercial mortgage loans for which it is the primary lender or a participant or co-lender in a mortgage loan agreement and mezzanine loans that are subordinate to senior secured first liens. Residential mortgage loans are primarily seasoned pools of homogeneous residential mortgage loans substantially backed by Federal Housing Administration (FHA) and Veterans Administration (VA) guarantees.

The carrying value and fair value of the Company's mortgage loans were as follows:

		Septembe	er 30), 2020		December 31, 2019				
	C	Carrying		Fair		Carrying		Fair		
		Value		Value	Value			Value		
				(In M	Iillio	ns)

Residential mortgage loans:										
FHA insured and VA guaranteed		2,799		2,827		2,684		2,673		
Other residential loans		825		795	_	731		734		
Total residential mortgage loans		3,624		3,622	_	3,415		3,407		
Total mortgage loans	\$	29,065	\$	29,900	\$	28,408	\$	29,364		

As of September 30, 2020 and December 31, 2019, the loan-to-value ratios of 99% of the Company's commercial mortgage loans were less than 81%.

As of September 30, 2020, the Company had impaired mortgage loans with or without a valuation allowance or mortgage loans derecognized as a result of foreclosure, including mortgage loans subject to a participant or co-lender mortgage loan agreement with a unilateral mortgage loan foreclosure restriction or mortgage loan derecognized as a result of a foreclosure.

The following presents a summary of the Company's impaired mortgage loans as of September 30, 2020:

	September 30, 2020									
			Ave	rage	Unp	aid

Other	326		286	
LIHTCs	211		242	
Mortgage loans	786		673	
Surplus notes	408		363	
Total	\$ 9,345	\$	9,172	

In the third quarter of 2020, there was a decrease in carrying value of an affiliated partnership and LLC of \$245 million, which included an other-than-temporary impairment (OTTI) of \$257 million from one investment.

e. Derivatives

The Company uses derivative financial instruments in the normal course of business to manage risks, primarily to reduce currency, interest rate and duration imbalances determined in asset/liability analyses. The Company also uses a combination of derivatives and fixed income investments to create replicated synthetic investments. These replicated synthetic investments are created when they are economically more attractive than the actual instrument or when similar instruments are unavailable. Replicated synthetic investments are created either to hedge and reduce the Company's credit exposure or to create an investment in a particular asset. The Company held replicated synthetic investments with a notional amount of \$20,339 million as of September 30, 2020 and \$16,039 million as of December 31, 2019, as defined under statutory accounting practices as the result of pairing of a long derivative contract with cash instruments.

The Company's principal derivative exposures to market risk are interest rate risk, which includes inflation and credit risk. Interest rate risk pertains to the change in fair value of the derivative instruments as a result of changes in market interest rates. The Company is exposed to credit-related losses in the event of nonperformance by counterparties to derivative financial instruments. The Company regularly monitors counterparty credit ratings, derivative positions, valuations and the value of collateral posted to ensure counterparties are credit-worthy and the concentration of exposure is minimized, and monitors its derivative credit exposure as part of its overall risk management program.

The Company enters derivative transactions through bilateral derivative agreements with counterparties, or through over the counter cleared derivatives with a counterparty and the use of a clearinghouse. To minimize credit risk for bilateral transactions, the Company and its counterparties generally enter into master netting agreements based on agreed upon requirements that outline the framework for how collateral is to be posted in the amount owed under each transaction, subject to certain minimums. For over the counter cleared derivative transactions between the Company and a counterparty, the parties enter into a series of master netting and other agreements that govern, among other things, clearing and collateral requirements. These transactions are cleared through a clearinghouse and each derivative counterparty is only exposed to the default risk of the clearinghouse. Certain interest rate swaps and credit default swaps are considered cleared transactions. These cleared transactions require initial and daily variation margin collateral postings. These agreements allow for contracts in a positive position, in which amounts are due to the Company, to be offset by contracts in a negative position. This right of offset, combined with collateral obtained from counterparties, reduces the Company's credit exposure.

Net collateral pledged by the counterparties was \$7,867 million as of September 30, 2020 and \$2,146 million as of December 31, 2019. In the event of default, the full market value exposure at risk in a net gain position, net of offsets and collateral, was \$106 million as of September 30, 2020 and \$54 million as of December 31, 2019. The statutory

net amount at risk, defined as net collateral pledged and statement values excluding accrued interest, was \$597 million as of September 30, 2020 and \$421 million as of December 31, 2019.

The Company had the right to rehypothecate or repledge securities totaling \$2,396 million of the \$7,867 million as of September 30, 2020 and \$1,136 million of the \$2,146 million as of December 31, 2019 of net collateral pledged by counterparties. There were no securities rehypothecated to other counterparties as of September 30, 2020 or December 31, 2019.

The following summarizes the carrying values and notional amounts of the Company's derivative financial instruments:

Collateral posted		(9,124)		(1,257)		(7,867)		(4,531)		(2,385)		(2,146)		
Net	\$	(3,269)	\$	(416)	\$	(2,853)	\$	(1,074)	\$	(164)	\$	(910)		

f. Net investment income

Net investment income, including IMR amortization, comprised the following:

	Nine Months Ended				
	September 30,				
	2020		2019		
	(In M	illion	s)		
Bonds	\$ 3,438	\$	3,463		
Preferred stocks	14		19		
Common stocks - subsidiaries and affiliates	65		300		
Common stocks - unaffiliated	30		29		
Mortgage loans	940		826		
Policy loans	719		696		
Real estate	65		96		
Partnerships and limited liability companies	251		348		
Derivatives	368		270		
Cash, cash equivalents and short-term investments	94		68		
Other	 31		41		
Subtotal investment income	6,015		6,156		
Amortization of the IMR	43		16		
Investment expenses	 (537)		(589)		
Net investment income	\$ 5,521	\$	5,583		

g. Net realized capital (losses) gains

Net realized capital (losses) gains, which include OTTI and are net of deferral to the IMR, comprised the following:

	Nine Months Ended				
	September 30,				
	2	2020	2	2019	
		(In Mi	llions	()	
Bonds	\$	(51)	\$	4	
Preferred stocks		(20)		_	
Common stocks - subsidiaries and affiliates		1		1	
Common stocks - unaffiliated		(113)		24	
Mortgage loans		(62)		1	
Real estate		(30)		33	
Partnerships and limited liability companies		(74)		(42)	
Derivatives		1,528		1,265	
Other		35		(18)	
Net realized capital gains before federal					
and state taxes and deferral to the IMR		1,214		1,268	
Net federal and state tax expense		(181)		(112)	
Net realized capital gains before deferral					
to the IMR		1,033		1,156	
Net after tax (gains) deferred to the IMR	(1,431)	(1,029)	
Net realized capital (losses) gains	\$	(398)	\$	127	

The IMR liability balance was \$1,958 million as of September 30, 2020 and \$547 million as of December 31, 2019 and was included in other liabilities on the Condensed Consolidated Statutory Statements of Financial Position.

OTTI, included in the realized capital losses, consisted of the following:

	ľ	Nine Months Ended				
		Septen	ıber 3	30,		
		2020	2	2019		
		s)				
Bonds	\$	(126)	\$	(94)		
Common stocks - unaffiliated		(82)		(8)		
Mortgage loans		(13)		-		
Partnerships and limited liability companies		(80)		(47)		
Total OTTI	\$	(301)	\$	(149)		

The Company recognized OTTI of \$9 million for the nine months ended September 30, 2020 and \$6 million for the nine months ended September 30, 2019 on structured and loan-backed securities, which are included in bonds, primarily due to the present value of expected cash flows being less than the amortized cost.

6. Federal income taxes

In response to the COVID-19 pandemic, the CARES Act was signed into law on March 27, 2020. The CARES Act, among other things, permits net operating loss (NOL) carryovers and carrybacks to offset 100% of taxable income for taxable years beginning before 2021. In addition, the CARES Act allows NOLs incurred in 2018, 2019, and 2020 to be carried back to each of the five preceding taxable years to generate a refund of previously paid income taxes. The Company is currently evaluating the impact of the CARES Act, but does not expect that the business tax provisions of the CARES Act to have a material impact on the financial statements.

7. Other than invested assets

No significant changes.

8. Policyholders' liabilities

a. Liabilities for deposit-type contracts

On January 14, 2020, MassMutual issued a \$550 million funding agreement with a 2.35% fixed rate and a 7-year maturity.

On January 15, 2020, MassMutual issued a \$540 million funding agreement with a 3-month LIBOR rate and a 2-year maturity.

On June 9, 2020, MassMutual issued a \$1,000 million funding agreement with a 0.85% fixed rate and a 3-year maturity.

On August 17, 2020, MassMutual issued a \$580 million funding agreement with a 0.76% fixed rate and a 5-year maturity.

On August 28, 2020, MassMutual issued a \$400 million funding agreement with a 0.48% fixed rate and a 3-year maturity.

b. Additional liability for annuity contracts

Certain variable annuity contracts include additional death or other insurance benefit features, such as guaranteed minimum death benefits (GMDB), guaranteed minimum income benefits (GMIB), guaranteed minimum accumulation benefits (GMAB) and guaranteed minimum withdrawal benefits (GMWB). In general, living benefit guarantees require the contract holder or policyholder to adhere to a company approved asset allocation strategy. Election of these benefit guarantees is generally only available at contract issue.

The following shows the changes in the liabilities for GMDB, GMIB, GMAB and GMWB (in millions):

Liability as of January 1, 2019	\$ 760
Incurred guarantee benefits	(163)
Paid guarantee benefits	 (9)
Liability as of December 31, 2019	588
Incurred guarantee benefits	362
Paid guarantee benefits	 (7)
Liability as of September 30, 2020	\$ 943

The following summarizes the account values, net amount at risk and weighted average attained age for variable annuity contracts with GMDB, GMIB, GMAB and GMWB classified as policyholders' reserves and separate account liabilities. The net amount at risk is defined as the minimum guarantee less the account value calculated on a policyby-policy basis, but not less than zero.

		Se	2020		December 31, 2019						
				Net	Weighted		Net			Weighted	
	Account		Amount Average			A	Account		mount	Average	
		Value	at	Risk	Attained Age		Value	at Risk		Attained Age	
	(\$ In Millions)										
GMDB	\$	19,662	\$	76	65	\$	19,980	\$	63	65	
GMIB Basic		656		34	70		718		28	69	
GMIB Plus		2,489		583	68		2,906		532	68	
GMAB		2,285		7	61		2,544		2	60	
GMWB		137		13	72		151		10	71	

As of September 30, 2020, the GMDB account value above consists of \$4,270 million within the general account and \$15,392 million within separate accounts that includes \$4,146 million of modified coinsurance (MODCO) assumed. As of December 31, 2019, the GMDB account value above consists of \$4,121 million within the general account and \$15,859 million within separate accounts that includes \$4,088 million of MODCO assumed.

9. Reinsurance

For the nine months ended September 30, 2020, the Company increased its gross LTC policyholders' reserves by \$94 million through various assumption changes to reflect the risk inherent in the cash flows of this business. This risk is ceded to an unaffiliated reinsurer, therefore the ceded policyholders' reserves have also been increased by an additional \$94 million.

On July 1, 2020, MassMutual recaptured a coinsurance agreement and ceded the recaptured inforce business to a subsidiary of the initial reinsurer through a coinsurance funds withheld agreement. This resulted in an increase of invested assets of \$4,986 million with an offsetting funds withheld liability in the Condensed Consolidated Statutory Statements of Financial Position and a decrease in premium and other income collected with an offset in other cash provided from financing and miscellaneous sources in the Condensed Consolidated Statutory Statements of Cash Flows.

On September 8, 2020, the Company entered into a definitive agreement in which the Company's retirement plan business will be ceded to Empower Retirement through a series of reinsurance agreements for a ceding commission of \$2,350 million, subject to adjustments at closing. Pending regulatory approval, the transaction is expected to close during the fourth quarter of 2020.

10. Withdrawal characteristics

No significant changes.

11. Debt

No significant changes.

12. Employee benefit plans

The Company sponsors multiple employee benefit plans providing retirement, life, health and other benefits to employees, certain employees of unconsolidated subsidiaries, agents, general agents and retirees who meet plan eligibility requirements.

Net periodic cost

The net periodic cost represents the annual accounting income or expense recognized by the Company and is included in general insurance expenses in the Condensed Consolidated Statutory Statements of Operations. The net periodic cost recognized is as follows:

	Nine Months Ended September 30,								
		2020 2019			2020		2019		
		Pension Benefits				Other Postretirement			
						Benefits			
	(In Millions)								
Service cost		86	\$	83	\$	11	\$	9	
Interest cost		73		88		8		10	
Expected return on plan assets		(132)		(120)		-		-	
Amortization of unrecognized net actuarial and other losses		38		42		1		(1)	
Amortization of unrecognized prior service cost		_				(4)		(4)	
Total net periodic cost	\$	65	\$	93	\$	16	\$	14	

13. Employee compensation plans

No significant changes.

14. Surplus notes

On April 16, 2020, MassMutual issued \$700 million of surplus notes at a fixed 3.375% coupon rate maturing in 2050.

On June 26, 2020, MassMutual executed a drawdown of \$600 million from its pre-capitalized surplus notes (P-Caps) facility and received \$837 million in market value proceeds, at a fixed 5.077% coupon rate, maturing in 2069 and callable beginning in 2049. As of September 30, 2020, there was a remaining capacity of raising \$200 million of capital through the P-Caps facility.

The following table summarizes the surplus notes issued and outstanding as of September 30, 2020:

		Face		Carrying	Interest		Scheduled Interest		
Issue Date		Amount	mount Value			Maturity Date	Payment Dates		
	(\$ In Millions)			ns)					
11/15/1993	\$	250	\$	250	7.625%	11/15/2023	May 15 & Nov 15		
03/01/1994		100		100	7.500%	03/01/2024	Mar 1 & Sept 1		
05/12/2003		193		193	5.625%	05/15/2033	May 15 & Nov 15		
06/01/2009		130		128	8.875%	06/01/2039	Jun 1 & Dec 1		
01/17/2012		263		263	5.375%	12/01/2041	Jun 1 & Dec 1		
04/15/2015		258		254	4.500%	04/15/2065	Apr 15 & Oct 15

10/11/2019		838		582	3.729%	10/15/2070	Apr 15 & Oct 15		
04/16/2020		700		697	3.375%	04/15/2050	Apr 15 & Oct 15		
06/26/2020		600		835	5.077%	02/15/2069	Apr 15 & Oct 15		
Total	\$	3,807	\$	3,773					

15. Presentation of the Condensed Consolidated Statutory Statements of Cash Flows

The following table presents those transactions that have affected the Company's recognized assets or liabilities but have not resulted in cash receipts or payments during the nine months ended September 30, 2020 and 2019. Accordingly, the Company has excluded these non-cash activities from the Condensed Consolidated Statutory Statements of Cash Flows for the nine months ended September 30, 2020 and 2019.

		Nine Months Ended

16. Business risks, commitments and contingencies

a. Risks and uncertainties

The Company operates in a business environment subject to various risks and uncertainties. The principal risks include insurance and underwriting risks, investment and interest rate risks, currency exchange risk and credit risk. The combined impact of these risks could have a material, adverse effect on the Company's financial statements or result in operating losses in future periods. The Company employs the use of reinsurance, portfolio diversification, asset/liability management processes and other risk management techniques to mitigate the impact of these risks. The condensed risks and uncertainties disclosure should be read in conjunction with the consolidated statutory disclosure in the Company's 2019 audited yearend financial statements.

Insurance and underwriting risks

The Company prices its products based on estimated benefit payments reflecting assumptions with respect to mortality, morbidity, longevity, persistency, interest rates and other factors. If actual policy experience emerges that is significantly and adversely different from assumptions used in product pricing, the effect could be material to the profitability of the Company. For participating whole life products, the Company's dividends to policyholders primarily reflect the difference between actual investment, mortality, expense and persistency experience and the experience embedded in the whole life premiums and guaranteed elements. The Company also reinsures certain life insurance and other long term care insurance policies to mitigate the impact of its underwriting risk.

Investment and interest rate risks

The fair value, cash flows and earnings of investments can be influenced by a variety of factors including changes in interest rates, credit spreads, equity markets, portfolio asset allocation and general economic conditions. The Company employs a rigorous asset/liability management process to help mitigate the economic impacts of various investment risks, in particular, interest rate risk. By effectively matching the market sensitivity of assets with the liabilities they support, the impact of interest rate changes is addressed, on an economic basis, as the change in the value of the asset is offset by a corresponding change in the value of the supported liability. The Company uses derivatives, such as interest rate swaps and swaptions, as well as synthetic assets to reduce interest rate and duration imbalances determined in asset/liability analyses.

The levels of U.S. interest rates are influenced by U.S. monetary policies and by the relative attractiveness of U.S. markets to investors versus other global markets. As interest rates increase, certain debt securities may experience amortization or prepayment speeds that are slower than those assumed at purchase, impacting the expected maturity of these securities and the ability to reinvest the proceeds at the higher yields. Rising interest rates may also result in a decrease in the fair value of the investment portfolio. As interest rates decline, certain debt securities may experience accelerated amortization and prepayment speeds than what was assumed at purchase. During such periods, the Company is at risk of lower net investment income as it may not be able to reinvest the proceeds at comparable yields. Declining interest rates may also increase the fair value of the investment portfolio.

Interest rates also have an impact on the Company's products with guaranteed minimum payouts and on interest credited to account holders. As interest rates decrease, investment spreads may contract as crediting rates approach minimum guarantees, resulting in an increased liability.

In periods of increasing interest rates, policy loans, surrenders and withdrawals may increase as policyholders seek investments with higher perceived returns. This could result in cash outflows requiring the Company to sell invested assets at a time when the prices of those assets are adversely affected by the increase in market interest rates, which could cause the Company to realize investment losses.

Currency exchange risk

The Company has currency risk due to its non-U.S. dollar denominated investments and medium-term notes along with its indirect international operations. The Company mitigates a portion of its currency risk through the use of cross-currency swaps and forward contracts. Cross-currency swaps are used to minimize currency risk for certain non-U.S. dollar assets and liabilities through a pre-specified exchange of interest and principal. Forward contracts are used to hedge movements in exchange rates.

Credit and other market risks

The Company manages its investments to limit credit and other market risks by diversifying its portfolio among various security types and industry sectors as well as purchasing credit default swaps to transfer some of the risk.

Stressed conditions, volatility and disruptions in global capital markets or in particular markets or financial asset classes can have an adverse effect on the Company, in part because the Company has a large investment portfolio and assets supporting the Company's insurance liabilities are sensitive to changing market factors. Global market factors, including interest rates, credit spread, equity prices, real estate markets, foreign currency exchange rates, consumer spending, business investment, government spending, the volatility and strength of the capital markets, deflation and inflation, all affect the business and economic environment and, ultimately, the profitability of the Company's business. Disruptions in one market or asset class can also spread to other markets or asset classes. Upheavals in the financial markets can also affect the Company's business through their effects on general levels of economic activity, employment and customer behavior.

Asset-based fees calculated as a percentage of the separate account assets are a source of revenue to the Company. Gains and losses in the investment markets may result in corresponding increases and decreases in the Company's separate account assets and related revenue.

The spread of the coronavirus, causing increased cases of COVID-19, around the world in 2020 has caused significant volatility in U.S. and international markets. There is significant uncertainty around the breadth and duration of business disruptions related to COVID-19, as well as its impact on the U.S. and international economies. At this time, the Company is not able to reliably estimate the length and severity of the COVID-19 public health crises and, as such, cannot quantify its impact on the financial results, liquidity and capital resources and its operations in future periods.

Political Uncertainties

Political events, domestically or internationally, may directly or indirectly trigger or exacerbate risks related to product offerings, profitability, or any of the risk factors described above. Whether those underlying risk factors are driven by politics or not, the Company's dynamic approach to managing risks enables management to identify risks, internally and externally, develop mitigation plans, and respond to risks in an attempt to proactively reduce the potential impact of each underlying risk factor on the Company.

b. Litigation and regulatory matters

In the normal course of business, the Company is involved in disputes, litigation and governmental or regulatory inquiries, administrative proceedings, examinations and investigations, both pending and threatened. These matters, if resolved adversely against the Company or settled, may result in monetary damages, fines and penalties or require changes in the Company's business practices. The resolution or settlement of these matters is inherently difficult to predict. Based upon the Company's assessment of these pending matters, the Company does not believe that the amount of any judgment, settlement or other action arising from any pending matter is likely to have a material adverse effect on the consolidated statement of financial position. However, an adverse outcome in certain matters could have a material adverse effect on the consolidated results of operations for the period in which such matter is resolved, or an accrual is determined to be required, on the consolidated financial statement financial position, or on our reputation.

The Company evaluates the need for accruals of loss contingencies for each matter. When a liability for a matter is probable and can be estimated, the Company accrues an estimate of the loss and any related insurance recoveries, if any. An accrual is subject to subsequent adjustment as a result of additional information and other developments. The resolution of matters are inherently difficult to predict, especially in the early stages of matter. Even if a loss is probable, due to many complex factors, such as speed of discovery and the timing of court decisions or rulings, a loss or range of loss may not be reasonably estimated until the later stages of the matter. For matters where a loss is material and it is either probable or reasonably possible then it is disclosed. For matters where a loss may be reasonably possible, but not probable, or is probable but not reasonably estimated, no accrual is established, but the matter, if material, is disclosed.

In connection with the May 24, 2019 sale of OAC to Invesco, Invesco has identified an accounting matter related to four Master Limited Partnership funds managed by a subsidiary of OAC prior to the sale that Invesco has stated may result in an indemnification claim against MassMutual under the terms of the acquisition agreement. Under the terms of the agreement, MassMutual may be liable to Invesco under the acquisition agreement for a portion of any actual losses incurred by Invesco in excess of \$173 million and up to a cap of \$575 million. There are currently considerable uncertainties as to the nature, scope and amount of the potential losses for which Invesco may seek indemnity. In addition to the \$173 million deductible, it is uncertain whether the indemnification obligations set forth in the acquisition agreement would apply to this situation and MassMutual believes it has a number of defenses available that may mitigate its exposure to any losses claimed by Invesco should such obligations apply. However, the outcome of any indemnification dispute (including any resulting litigation), should Invesco assert such a claim, and its potential impact on MassMutual's financial position cannot be foreseen with certainty at this time.

17. Related party transactions

In March 2020, MassMutual contributed capital of \$37 million to MassMutual Mortgage Lending LLC.

In April 2020, MassMutual contributed capital of \$15 million to MassMutual MCAM Insurance Company, Inc.

In May 2020, MassMutual transferred \$335 million of mortgage loans to Barings Multifamily TEBS 2020 LLC. Subsequently, MassMutual received a \$288 million return of capital distribution.

In June 2020, Insurance Road LLC issued a return of capital of \$90 million to MassMutual for the six months ended June 30, 2020, which was paid in August 2020.

In September 2020, MassMutual Retirement Services LLC paid a \$50 million dividend to MassMutual.

18. Subsequent events

Management of the Company has evaluated subsequent events through November 13, 2020, the date the financial statements were available to be issued to state regulators and subsequently on the Company's website. No events have occurred subsequent to the date of the financial statements, except for:

On October 9, 2020, MassMutual issued a \$750 million funding agreement with a 1.55% fixed rate and a 10-year maturity.
