EXHIBIT 5 - INTERROGATORIES

| 1.1 1.2 | Has the reporting entity ever issued both participating and non-participating contracts? | Yes [|] | No | [X] |
|------------|--|-------|----|----|-------|
| | Non-Participating | | | | |
| 2.1 | Does the reporting entity at present issue both participating and non-participating contracts? | Yes [|] | No | [X] |
| 2.2 | If not, state which kind is issued. | | | | |
| | Non-Participating | | | | |
| 3. | Does the reporting entity at present issue or have in force contracts that contain non-guaranteed elements? | Yes [| Χ] | No | [] |
| | If so, attach a statement that contains the determination procedures, answers to the interrogatories and an actuarial opinion as described in the instructions. | | | | |
| 4. | Has the reporting entity any assessment or stipulated premium contracts in force? | Yes [|] | No | [X] |
| | If so, state: | | | | |
| | 4.1 Amount of insurance?\$ | | | | |
| | 4.2 Amount of reserve? | | | | |
| | 4.3 Basis of reserve: | | | | |
| | 4.4 Basis of regular assessments: | | | | |
| | 4.5 Basis of special assessments: | | | | |
| | 4.6 Assessments collected during the year\$ | | | | |
| 5. | If the contract loan interest rate guaranteed in any one or more of its currently issued contracts is less than 5%, not in advance, state the contract loan rate guarantees on any such contracts. | | | | |
| 6. | Does the reporting entity hold reserves for any annuity contracts that are less than the reserves that would be held on a standard basis? | Yes [|] | No | [X] |
| | 6.1 If so, state the amount of reserve on such contracts on the basis actually held: | | | | |
| | 6.2 That would have been held (on an exact or approximate basis) using the actual ages of the annuitants; the interest rate(s) used in 6.1; and the same mortality basis used by the reporting entity for the valuation of comparable annuity benefits issued to standard lives. If the reporting entity has no comparable annuity benefits for standard lives to be valued, the mortality basis shall be the table most recently approved by the state of domicile for valuing individual annuity benefits: | | | | |
| | Attach statement of methods employed in their valuation. | | | | |
| 7. | Does the reporting entity have any Synthetic GIC contracts or agreements in effect as of December 31 of the current year? | Yes [| 1 | No | [X] |
| | 7.1 If yes, state the total dollar amount of assets covered by these contracts or agreements | | | | |
| | 7.2 Specify the basis (fair value, amortized cost, etc.) for determining the amount: | | | | |
| | 7.3 State the amount of reserves established for this business:\$ | | | | |
| | 7.4 Identify where the reserves are reported in the blank: | | | | |
| 8. | Does the reporting entity have any Contingent Deferred Annuity contracts or agreements in effect as of December 31 of the current year? | Yes [|] | No | [X] |
| | 8.1 If yes, state the total dollar amount of account value covered by these contracts or agreements: | | | | |
| | 8.2 State the amount of reserves established for this business: | | | | |
| | 8.3 Identify where the reserves are reported in the blank: | | | | |
| 9. | Does the reporting entity have any Guaranteed Lifetime Income Benefit contracts, agreements or riders in effect as of December 31 of the current year? | Yes [| | | [X] |
| | 9.1 If yes, state the total dollar amount of any account value associated with these contracts, agreements or riders: | | | | |
| | 9.2 State the amount of reserves established for this business: | | | | |
| | 9.3 Identify where the reserves are reported in the blank: | | | | |

Note 1 - Summary of Significant Accounting Policies and Going Concern

a. Accounting practices:

The accompanying financial statements of C.M. Life Insurance Company (the Company) have been prepared in conformity with the Statutory Accounting Practices (SAP) of the National Association of Insurance Commissioners (NAIC) and the accounting practices prescribed or permitted by the State of Connecticut Insurance Department (the Department).

A reconciliation of the Company's net income and capital and surplus between NAIC SAP and practices prescribed and permitted by the State of Connecticut is shown below:

| | | F/S | F/S | | |
|---|----------|------|--------|---------------------|---------------------|

b. Use of estimates in the preparation of the financial statements:

The preparation of financial statements requires management to make estimates and assumptions that impact the reported amounts of assets and liabilities, the disclosure of assets and liabilities as of the date of the statutory financial statements and the reported amounts of revenues and expenses during the reporting periods. The most significant estimates include those used in determining the carrying values of investments including the amount of mortgage loan investment valuation reserves, other-than-temporary impairment(s) (OTTI), the liabilities for policyholders' reserves, the determination of admissible deferred tax assets (DTAs), the liability for taxes and litigation contingencies. Future events including, but not limited to, changes in the level of mortality, morbidity, interest rates, persistency, asset valuations and defaults could cause results to differ from the estimates used in the statutory financial statements. Although some variability is inherent in these estimates, management believes the amounts presented are appropriate.

c. Accounting policy:

Life insurance premium revenue is generally recognized annually on the anniversary date of the policy. However, premium for flexible products, primarily universal life and variable universal life contracts, is recognized as revenue when received. Annuity premium is recognized as revenue when received. Expenses incurred in connection with acquiring new insurance business, including certain acquisition costs, such as commissions, are charged to current operations as incurred. Policy loans are carried at the outstanding loan balance less amounts unsecured by the cash surrender value of the policy. Unsecured amounts can occur when subsequent charges are incurred on the underlying policy without the receipt of additional premium. Where applicable, the values of invested assets have been adjusted for impairments considered OTTI.

Investment real estate, which the Company has the intent to hold for the production of income, and real estate occupied by the Company, are carried at depreciated cost, less encumbrances. Depreciation is calculated using the straight-line method over the estimated useful life of the real estate holding, not to exceed 40 years. Depreciation expense is included in net investment income. Real estate held for sale is initially carried at the lower of depreciated cost or fair value less estimated selling costs and is no longer depreciated. Adjustments to carrying value, including for further declines in fair value, are recorded in a valuation reserve, which is included in realized capital losses.

In addition, the Company uses the following accounting policies:

- (1) Short-term investments, which are carried at amortized cost, consist of all highly liquid investments purchased with maturities of greater than three months and less than or equal to 12 months. Investments in short-term bonds are classified as shortterm investments.
- (2) Bonds are generally valued at amortized cost using the constant yield interest method with the exception of NAIC Category 6 bonds, which are in or near default, and certain residential mortgage-backed securities (RMBS) and commercial mortgage-backed securities (CMBS), which are rated by outside modelers, which are carried at the lower of amortized cost or fair value. NAIC ratings are applied to bonds and other securities. Categories 1 and 2 are considered investment grade, while Categories 3 through 6 are considered below investment grade. Bond transactions are recorded on a trade date basis, except for private placement bonds, which are recorded on the funding date.

The fair value of bonds is based on quoted market prices when available. If quoted market prices are not available, values provided by other third-party organizations are used. If values provided by other third-party organizations are unavailable, fair value is estimated using internal models by discounting expected future cash flows using observable current market rates applicable to yield, credit quality and maturity of the investment or using quoted market values for comparable investments. Internal inputs used in the determination of fair value include estimated prepayment speeds, default rates, discount rates and collateral values, among others. Structure characteristics and cash flow priority are also considered. Fair values resulting from internal models are those expected to be received in an orderly transaction between willing market participants.

Refer to Note 1c. "Accounting policy" (14) for information on the Company's policy for determining OTTI.

(3) Unaffiliated common stocks are carried at fair value, which is based on quoted market prices when available. If quoted market prices are not available, values provided by third-party organizations are used. If values from third parties are unavailable, fair values are determined by management using estimates based upon internal models. The Company's internal models include estimates based upon comparable company analysis, review of financial statements, broker quotes and last traded price. Fair values resulting from internal models are those expected to be received in an orderly transaction between willing market participants.

Refer to Note 1c. "Accounting policy" (14) for information on the Company's policy for determining OTTI.

The Company held unaffiliated common stocks, for which the transfer of ownership was restricted by contractual requirements, with carrying values of \$2,963,779 as of December 31, 2017 and \$1,379,467 as of December 31, 2016.

(4) Preferred stocks in good standing, those that are rated Categories 1 through 3 by the Securities Valuation Office (SVO) of the NAIC, are generally valued at amortized cost. Preferred stocks not in good standing, those that are rated Categories 4 through 6 by the SVO of the NAIC, are valued at the lower of amortized cost or fair value. Fair values are based on quoted market prices, when available. If quoted market prices are not available, values provided by third-party organizations are used. If values provided by third-party organizations are unavailable, fair value is estimated using internal models. These models use inputs not directly observable or correlated with observable market data. Typical inputs integrated into the Company's internal discounted expected earnings models include, but are not limited to, earnings before interest, taxes, depreciation and amortization estimates. Fair values resulting from internal models are those expected to be received in an orderly transaction between willing market participants.

Refer to Note 1c. "Accounting policy" (14) for information on the Company's policy for determining OTTI.

The Company held preferred stocks for which the transfer of ownership was restricted by contractual requirements with carrying values of \$6,724,194 as of December 31, 2017 and \$6,641,056 as of December 31, 2016.

(5) Mortgage loans are valued at the unpaid principal balance of the loan, net of unamortized premium, discount, mortgage origination fees and valuation allowances. Interest income earned on impaired loans is accrued on the outstanding principal balance of the loan based on the loan's contractual coupon rate. Interest is not accrued for (a) impaired loans more than 60 days past due, (b) delinquent loans more than 90 days past due, or (c) loans that have interest that is not expected to be collected. The Company continually monitors mortgage loans where the accrual of interest has been discontinued, and will resume the accrual of interest on a mortgage loan when the facts and circumstances of the borrower and property indicate that the payments will continue to be received according to the terms of the original or modified mortgage loan agreement.

Mortgage loans comprised commercial mortgage loans and residential mortgage loans. The Company holds commercial mortgage loans for which it is a participant or co-lender in a mortgage loan agreement and mezzanine loans that are subordinate to senior secured first liens. The Company's loan agreements with the senior lender contain negotiated provisions that are designed to maximize the Company's influence with the objective of mitigating the Company's risks as the secondary lender for mezzanine loans. Commercial mortgage loans have varying risk characteristics including, among others, the borrower's liquidity, the underlying percentage of completion of a project, the returns generated by the collateral, the refinance risk associated with maturity of the loan and deteriorating collateral value. Residential mortgage loans are primarily seasoned pools of homogeneous residential mortgage loans substantially backed by Federal Housing Administration (FHA) and Veterans Administration (VA) guarantees.

Refer to Note 1c. "Accounting policy" (14) for information on the Company's policy for determining OTTI.

(6) For loan-backed and structured securities, such as asset-backed securities (ABS), mortgage-backed securities (MBS), including RMBS and CMBS, and structured securities, including collateralized debt obligations (CDOs), amortization or accretion is revalued quarterly based on the current estimated cash flows, using either the prospective or retrospective adjustment methodologies.

Certain fixed income securities, with the highest ratings from a rating agency follow the retrospective method of accounting. Under the retrospective method, the recalculated effective yield equates the present value of the actual and anticipated cash flows, including new prepayment assumptions, to the original cost of the investment. Prepayment assumptions are based on borrower constraints and economic incentives such as the original term, age and coupon of the loan as affected by the interest rate environment. The current carrying value is then increased or decreased to the amount that would have resulted had the revised yield been applied since inception, and investment income is correspondingly decreased or increased.

All other fixed income securities, such as floating rate bonds and interest only securities, including those that have been impaired, follow the prospective method of accounting. Under the prospective method, the recalculated future effective yield equates the carrying value of the investment to the present value of the anticipated future cash flows.

Refer to Note 1c. "Accounting policy" (14) for information on the Company's policy for determining OTTI.

(7) The Company accounts for the value of its subsidiary and affiliate, primarily its investment in MML Bay State Life Insurance Company (MML Bay State), a wholly owned stock life insurance subsidiary, at its underlying statutory net equity. MML Bay State's operating results, less dividends declared, are reflected as net unrealized capital gains within the Capital and Surplus Account on the Summary of Operations. Dividends are recorded in net investment income when declared and received. The cost basis of common stocks - subsidiary and affiliate is adjusted for impairments deemed to be other than temporary consistent with common stocks - unaffiliated.

Refer to Note 1c. "Accounting policy" (14) for information on the Company's policy for determining OTTI.

(8) Partnerships and limited liability companies (LLCs), except for partnerships that generate and realize low income housing tax credits (LIHTCs), are accounted for using the equity method with the change in the equity value of the underlying investment recorded in surplus. Distributions received are recognized as net investment income to the extent the distribution does not exceed previously recorded accumulated undistributed earnings.

Investments in partnerships that generate LIHTCs are carried at amortized cost unless considered impaired. Under the amortized cost method, the excess of the carrying value of the investment over its estimated residual value is amortized into income during the period in which tax benefits are recognized.

The equity method is suspended if the carrying value of the investment is reduced to zero due to losses from the investment. Once the equity method is suspended, losses are not recorded until the investment returns to profitability and the equity method is resumed. However, if the Company has guaranteed obligations of the investment or is otherwise committed to provide further financial support for the investment, losses will continue to be reported up to the amount of those guaranteed obligations or commitments.

Refer to Note 1c. "Accounting policy" (14) for information on the Company's policy for determining OTTI.

(9) Derivative financial instruments are carried at fair value, which is based primarily upon quotations obtained from counterparties and independent sources. These quotations are compared to internally derived prices and a price challenge is lodged with the counterparties and independent sources when a significant difference cannot be explained by appropriate adjustments to the internal model. When quoted market values are not reliable or available, the value is based on an internal valuation

process using market observable inputs that other market participants would use. Changes in the fair value of these instruments, other than interest rate swaps and credit default swaps associated with replicated assets, are recorded as unrealized capital gains (losses) in surplus. Gains and losses realized on settlement termination, closing or assignment of contracts are recorded as realized capital gains (losses). Amounts receivable and payable are accrued as net investment income.

- (10) The Company does not utilize anticipated investment income as a factor in the premium deficiency calculation in accordance with Statutory Accounting Principles (SSAP) No. 54 "Individual and Group Accident and Health Contracts."
- (11) The Company does not have disability or long-term care contracts therefore it does not have any unpaid claim or claim expense reserves related to these products.
- (12) The Company has not modified its capitalization policy from the prior period.
- (13) The Company did not issue any business that would give rise to pharmaceutical rebates or risk sharing receivables.
- (14) The book values of investments are written down when declines in values are considered to be other than temporary.

Bonds - general

The Company employs a systematic methodology to evaluate OTTI by conducting a quarterly analysis of bonds. OTTI is evaluated in a manner consistent with market participant assumptions. The Company considers the following factors, where applicable depending on the type of securities, in the evaluation of whether a decline in value is other than temporary: (a) the likelihood that the Company will be able to collect all amounts due according to the contractual terms of the debt security; (b) the present value of the expected future cash flows of the security; (c) the characteristics, quality and value of the underlying collateral or issuer securing the position; (d) collateral structure; (e) the length of time and extent to which the fair value has been below amortized cost; (f) the financial condition and near-term prospects of the issuer; (g) adverse conditions related to the security or industry; (h) the rating of the security; (i) the Company's ability and intent to hold the investment for a period of time sufficient to allow for an anticipated recovery to amortized cost; and (j) other qualitative and quantitative factors in determining the existence of OTTI including, but not limited to, unrealized loss trend analysis and significant short-term changes in value.

In addition, if the Company has the intent to sell, or the inability, or lack of intent to retain the investment for a period sufficient to recover the amortized cost basis, an OTTI is recognized as a realized loss equal to the entire difference between the investment's amortized cost basis and its fair value at the balance sheet date.

When a bond is other-than-temporarily impaired, a new cost basis is established.

Bonds - corporate

For corporate securities, if it is determined that a decline in the fair value of a bond is other than temporary, OTTI is recognized as a realized loss equal to the difference between the investment's amortized cost basis and, generally, its fair value at the balance sheet date.

Bonds - loan-backed and structured securities

For loan-backed and structured securities, if the present value of cash flows expected to be collected is less than the amortized cost basis of the security, an OTTI is recognized as a realized loss equal to the difference between the investment's amortized cost basis and the present value of cash flows expected to be collected. The expected cash flows are discounted at the security's effective interest rate. Internal inputs used in determining the amount of the OTTI on structured securities include collateral performance, prepayment speeds, default rates, and loss severity based on borrower and loan characteristics, as well as deal structure including subordination, over-collateralization and cash flow priority.

ABS and MBS are evaluated for OTTI using scenarios and assumptions based on the specifics of each security including collateral type, loan type, vintage and subordination level in the structure. Cash flow estimates are based on these assumptions and inputs obtained from external industry sources along with internal analysis and actual experience. Where applicable, assumptions include prepayment speeds, default rates and loss severity, weighted average maturity and changes in the underlying collateral values.

The Company has a review process for determining if CDOs are at risk for OTTI. For the senior, mezzanine and junior debt tranches, cash flows are modeled using multiple scenarios based on the current ratings and values of the underlying corporate credit risks and incorporating prepayment and default assumptions that vary according to collateral attributes of each CDO. The prepayment and default assumptions are varied within each model based upon rating (base case), historical expectations (default), rating change improvement (optimistic), rating change downgrade (pessimistic) and fair value (market). The default rates produced by these multiple scenarios are assigned an expectation weight according to current market and economic conditions and fed into a final scenario. OTTI is recorded if this final scenario results in the loss of any principal or interest payments due.

For the most subordinated junior CDO tranches, the present value of the projected cash flows in the final scenario is measured using an effective yield. If the current book value of the security is greater than the present value measured using an effective yield, an OTTI is taken in an amount sufficient to produce its effective yield. Certain CDOs cannot be modeled using all of the scenarios because of limitations on the data needed for all scenarios. The cash flows for these CDOs, including foreign currency denominated CDOs, are projected using a customized scenario management believes is reasonable for the applicable collateral pool.

For loan-backed and structured securities, any difference between the new amortized cost basis and any increased present value of future cash flows expected to be collected is accreted into net investment income over the expected remaining life of the bond.

Common and preferred stock

The cost basis of common and preferred stocks is adjusted for impairments deemed to be other than temporary. The Company considers the following factors in the evaluation of whether a decline in value is other than temporary: (a) the financial condition and near-term prospects of the issuer; (b) the Company's ability and intent to retain the investment for a period sufficient to allow for a near-term recovery in value; and (c) the period and degree to which the value has been below cost. The Company conducts a quarterly analysis of issuers whose common or preferred stock is not-in-good standing or valued below 80% of cost. The Company also considers other qualitative and quantitative factors in determining the existence of OTTI including,

but not limited to, unrealized loss trend analysis and significant short-term changes in value.

Mortgage loans

The Company performs internal reviews at least annually to determine if individual mortgage loans are performing or nonperforming. The fair values of performing mortgage loans are estimated by discounting expected future cash flows using current interest rates for similar loans with similar credit risk. For nonperforming loans, the fair value is the estimated collateral value of the underlying real estate. If foreclosure is probable, the Company will obtain an external appraisal.

Mortgage loans are considered to be impaired when, based upon current available information and events, it is probable that the Company will be unable to collect all amounts of principal and interest due according to the contractual terms of the mortgage loan agreement. A valuation allowance is recorded on a loan-by-loan basis in net unrealized capital losses for the excess of the carrying value of the mortgage loan over the fair value of its underlying collateral. Such information or events could include property performance, capital budgets, future lease roll, a property inspection as well as payment trends. Collectability and estimated decreases in collateral values are also assessed on a loan-by-loan basis considering all events and conditions relevant to the loan. This evaluation is inherently subjective as it requires estimates that are susceptible to significant revisions as more information becomes available, as changes occur in the market or as negotiations with the borrowing entity evolve. If there is a change in the fair value of the underlying collateral or the estimated loss on the loan, the valuation allowance is adjusted accordingly. An OTTI occurs upon the realization of a credit loss, typically through foreclosure or after a decision is made to accept a discounted payoff, and is recognized in realized capital losses. The previously recorded valuation allowance is reversed from unrealized capital losses. When an OTTI is recorded, a new cost basis is established reflecting estimated value of the collateral.

Real estate

For real estate held for the production of income, depreciated cost is adjusted for impairments whenever events or changes in circumstances indicate the carrying amount of the asset may not be recoverable, with the impairment being included in realized capital losses. An impairment is recorded when the property's estimated future net operating cash flows over ten years, undiscounted and without interest charges, is less than book value.

Adjustments to the carrying value of real estate held for sale are recorded in a valuation reserve as realized capital losses when the fair value less estimated selling costs is less than the carrying value.

Partnerships and LLCs

When it is probable that the Company will be unable to recover the outstanding carrying value of an investment based on undiscounted cash flows, or there is evidence indicating an inability of the investee to sustain earnings to justify the carrying value of the investment, OTTI is recognized in realized capital losses reflecting the excess of the carrying value over the estimated fair value of the investment. The estimated fair values of limited partnership interests are generally based on the Company's share of the net asset value (NAV) as provided in the financial statements of the investees. In certain circumstances, management may adjust the NAV by a premium or discount when it has sufficient evidence to support applying such adjustments.

For determining impairments in partnerships that generate LIHTCs, the Company uses the present value of all future benefits, the majority of which are tax credits, discounted at a risk-free rate for future benefits of ten or more years and compares the results to its current book value. Impairments are recognized in realized capital losses reflecting the excess of the carrying value over the estimated fair value of the investment.

Going concern:

There is not substantial doubt regarding the Company's ability to continue as a going concern.

Note 2 – Accounting Changes and Corrections of Errors

a. For the year ended December 31, 2017, corrections of prior years' errors were recorded in shareholder's equity, net of tax:

| | Increase (Decrease) to: | | | | | | | | | |
|--|-------------------------|-------------|----|-------------|----|--------------|--|--|--|--|
| | Prior | | | Current | | Asset | | | | |
| | Years' | | | Year | | or Liability | | | | |
| | 1 | Net Income | | Surplus | | Balances | | | | |
| Partnerships and limited liability companies | \$ | - | \$ | (227,387) | \$ | (227,387) | | | | |
| Other than invested assets | | (1,899,255) | | (1,899,255) | | (1,899,255) | | | | |
| General expenses due or accrued | | (447,929) | | (447,929) | | 447,929 | | | | |
| Other Liabilities | | (351,787) | | (351,787) | | 351,787 | | | | |
| Total | \$ | (2,698,971) | \$ | (2,926,358) | | | | | | |

Of the \$2,926,358 decrease to surplus for prior years' errors, \$2,698,971 was recorded as prior period adjustments and \$227,387 was recorded, net of tax, as a change in nonadmitted assets in the Statutory Statements of Changes in Surplus.

For the year ended December 31, 2016, corrections of prior years' errors were recorded in shareholder's equity, net of tax:

| | Increase (Decrease) to: | | | | | | | |
|-------------------------------|-------------------------|-------------|----|-------------|----------|--------------|--|--|
| | Prior | | | Current | | Asset | | |

| Total | \$ | (1,862,209) | \$ | (1,862,209) | | | | |

Certain prior year amounts within these financial statements have been reclassified to conform to the current year presentation.

Adoption of new accounting standards

In June 2016, the NAIC adopted modifications to SSAP No. 26R, *Bonds, Excluding Loan-backed and Structured Securities*, and SSAP No. 43R, *Loan-backed and Structured Securities*, which were effective January 1, 2017 and should be prospectively applied. These modifications clarified that the amount of prepayment penalties or acceleration fees reported as investment income should equal the total proceeds received less the par value of the investment; and any difference between the carrying value and the par value at the time of disposal will be reported as realized capital gains and losses. These modifications also added specific disclosures related to securities sold, redeemed or otherwise disposed of as a result of a callable feature. These modifications did not have a significant impact on the Company's financial statements.

In June 2016, the NAIC adopted substantive revisions to SSAP No. 51R, *Life Contracts*, to incorporate references to the Valuation Manual (VM) and to facilitate the implementation of principles-based reserving (PBR), which were effective on January 1, 2017. The adoption of PBR only applies to new life insurance policies issued after January 1, 2017, however the Company plans to adopt these revisions to SSAP No. 51 using the 3-year phased in approach by no later than January 1, 2020. The Company currently uses formulas and assumptions to determine reserves as prescribed by state laws and regulations. Under PBR, the Company will be required to hold the higher of (a) the reserve using prescribed factors and (b) the PBR reserve which considers a wide range of future economic conditions, computed using justified company experience factors, such as mortality, policyholder behavior and expenses. The Company is currently assessing the impact of these modifications on the Company's financial statements.

In August 2016, the NAIC adopted modifications to SSAP No. 51R, *Life Contracts*, which were effective January 1, 2017. These modifications clarified that annual assumption changes from reserving methods used in PBR would not qualify as a change in valuation basis. Changes in valuation basis are recorded directly to surplus instead of through income. These modifications were made to accommodate PBR which became effective January 1, 2017. These modifications are not expected to have an impact on the Company's financial statements.

In April 2017, the NAIC adopted modifications to SSAP No. 26R, *Bonds*, which is effective December 31, 2017. These modifications are part of an ongoing investment classification project. These modifications (a) provide a definition of a security, (b) update the description of bonds included in scope of the guidance, (c) require fair value accounting for certain Securities Valuation Office (SVO) identified investments, such as bond exchange traded funds, unless a systematic value has been elected, and (d) clarify the scope of the standard to specifically include bank loans acquired through organization, participation, syndication or assignment. The adoption of these modifications did not have an impact on the Company's financial statements in 2017.

In June 2017, the NAIC adopted modifications to SSAP No. 30, *Unaffiliated Common Stock*, SSAP No. 48, *Joint Ventures, Partnerships and Limited Liability Companies*, and SSAP No. 97, *Investments in Subsidiary, Controlled and Affiliated Entities* as they relate to ASU 2016-07, *Simplifying the Transition to the Equity Method of Accounting* which were effective January 1, 2017. These modifications included the definition of control and provided guidance as to when an investment qualified (or no longer qualifies) for the equity method of accounting. These modifications further specified that when the level of investment in a subsidiary, controlled or affiliated (SCA) entity fell below the level of control, defined as the possession, directly or indirectly, of the power to direct or cause the direction of the management and policies of the investee in SSAP No. 97, the reporting entity should discontinue the use of the equity method of accounting. When an entity becomes qualified to use the equity method of accounting, the entity should add the cost of acquiring the additional interest in the investee to the current basis of the previously held interest and apply the equity method of accounting, prospectively. The Company has adopted these modifications.

In June 2017, the NAIC adopted modifications to SSAP No. 37, *Mortgage Loans*, which became effective June 8, 2017. These modifications clarify that a reporting entity providing a mortgage loan as a "participant in a mortgage loan agreement", should consider the mortgage loan in the scope of SSAP No. 37. Specifically, in addition to mortgage loans directly originated, a mortgage loan also includes mortgages acquired through assignment, syndication or participation. These modifications also clarify the impairment assessment and incorporate new disclosures for these types of mortgage loans to identify mortgage loans in which the insurer is a participant or co-lender. These modifications did not have a financial impact on the Company. The Company has added the additional disclosures to the Company's financial statements.

Note 3 - Business Combinations and Goodwill

- a. The Company did not have any business combinations accounted for using the statutory purchase method.
- b. There were no business combinations taking the form of a statutory merger.
- c. The Company did not enter into any assumption reinsurance agreements.
- d. The Company did not recognize an impairment loss on the transactions described above.

Note 4 - Discontinued Operations

The Company did not have any discontinued operations.

Note 5 - Investments

- a. Mortgage loans, including mezzanine real estate loans:
 - (1) The maximum and minimum lending rates for new mortgage loans during 2017 were: Commercial mortgage loans 9.8% and 3.4% and residential mortgage loans 4.6% and 3.6%. The Company did not originate any new mezzanine real estate loans.

The maximum and minimum lending rates for new mortgage loans during 2016 were: Commercial mortgage loans 6.0% and 3.2% and residential mortgage loans 4.4% and 4.3%. The Company did not originate any new mezzanine real estate loans.

- (2) The maximum percentage of any one commercial mortgage loan to the estimated value of secured collateral at the time the loan was originated, exclusive of mezzanine, insured, guaranteed or purchase money mortgages, was 79.3% as of December 31, 2017 and 2016. The maximum percentage of any one mezzanine loan to the estimated value of secured collateral at the time the loan was originated was 43.4% as of December 31, 2017 and 60.3% as of December 31, 2016.
- (3) As of December 31, 2017 and 2016, the Company did not have any taxes, assessments and amounts advanced and not included in the mortgage loan total.

(4) Age analysis of mortgage loans and identification of mortgage loans in which the insurer is a participant or co-lender in a mortgage loan agreement:

| | | | | | | | | === | - | | | |

- (8) As of December 31, 2017, the Company did not have any mortgage loans derecognized as a result of foreclosure.
- (9) Interest income earned on impaired loans is accrued on the outstanding principal balance of the loan based on the loan's contractual coupon rate. Interest is not accrued for (a) impaired loans more than 60 days past due, (b) delinquent loans more than 90 days past due, or (c) loans that have interest that is not expected to be collected. The Company continually monitors mortgage loans where the accrual of interest has been discontinued, and will resume the accrual of interest on a mortgage loan when the facts and circumstances of the borrower and property indicate that the payments will continue to be received according to the terms of the original or modified mortgage loan agreement.
- b. Debt restructuring:

As of December 31, 2017 and 2016, the Company did not have any restructured debt.

- c. Reverse mortgages:
 - As of December 31, 2017 and 2016, the Company did not have any reverse mortgages.
- d. Loan-backed and structured securities:
 - (1) Prepayment assumptions for loan-backed and structured securities are based on various assumptions and inputs obtained from external industry sources along with internal analysis and actual experience.
 - (2) The following contains loan-backed and structured securities that recognized OTTI classified on the following bases for recognizing OTTI:

(4) As of December 31, 2017, the gross unrealized losses and fair values for investments in structured and loan-backed securities for which an OTTI has not been recognized in earnings follow:

a. The aggregate amount of unrealized losses:

Less than 12 months
 12 months or longer
 (578,796)
 (1,913,913)

b. The aggregate related fair value of securities with unrealized losses:

 1. Less than 12 months
 \$ 48,657,236

 2. 12 months or longer
 \$ 75,428,927

- (5) No additional information.
- e. Repurchase Agreements Transactions Accounted for as Secured Borrowing:
 - (1) The Company has entered into repurchase agreements whereby the Company sells securities and simultaneously agrees to repurchase the same or substantially the same securities. These repurchase agreements are accounted for as collateralized borrowings with the proceeds from the sale of the securities recorded as a liability and the underlying securities continue to be recorded as an investment by the Company. Earnings on these investments are recorded as investment income and the difference between the proceeds and the amount at which the securities will be subsequently reacquired is amortized as interest expense. Repurchase agreements are used as a tool for overall portfolio management to help ensure the Company maintains adequate assets in order to provide yield, spread and duration to support liabilities and other corporate needs.

The Company provides collateral, as dictated by the repurchase agreements, to the counterparty in exchange for a loan. If the fair value of the securities sold becomes less than the loan, the counterparty may require additional collateral.

The carrying value, which is at cost, reported in the Statutory Statements of Financial Position for repurchase agreements approximates the fair value.

Per NAIC instructions, information about the fourth quarter (year-end 2017) balances are included below, without retrospective application of the quarterly detail.

f. Real estate:

- (1) The Company did not have any investments in real estate for the years ended December 31, 2017 and 2016.
- g. Low income housing tax credit properties:
 - (1) LIHTC investments currently have unexpired tax credits which range from one to thirteen years and have an initial 15-year holding period requirement.
 - (2) There are no LIHTC investments subject to regulatory review for the years ended December 31, 2017 or 2016.
 - (3) Aggregate LIHTC investments did not exceed 10% of total admitted assets for the years ended December 31, 2017 or 2016.
 - (4) LIHTC investments had a carrying value of \$1,532,526 as of December 31, 2017 and \$2,182,817 as of December 31, 2016.
 - (5) The Company recognized tax benefits from LIHTC of \$244,842 in 2017 and \$484,060 in 2016.
 - (6) For determining impairments in partnerships that generate LIHTC, the Company uses the present value of all future benefits, the majority of which are tax credits, discounted at a risk-free rate ranging from 1.8% for future benefits of two years to 2.4% for future benefits of ten or more years, and compares the result to current carrying value. OTTI for LIHTC investments were \$224,652 for the year ended December 31, 2017. There were no impairments taken during the year ended December 31, 2016.
 - (7) There were no write-downs or reclassifications made during the years ended December 31, 2017 or 2016 due to forfeiture, ineligibility of tax credits or similar issues.

\$

k. Structured notes:

A structured note is a direct debt issuance by a corporation, municipality, or government entity, ranking pari-passu with the issuer's other debt issuance of equal seniority where either: (a) the coupon and/or principal payments are linked, in whole or in part, to prices or payment streams from index or indices, or assets deriving their value from other than the issuer's credit quality, or (b) the coupon and/or principal payments are leveraged by a formula that is different from either a fixed coupon, or a non-leveraged floating rate coupon linked to an interest rate index, including but not limited to the London Interbank Offered Rate (LIBOR) or the prime rate. As structured notes are issuer obligations without a trust, they are within the scope of SSAP No. 26, "Bonds, Excluding Loan-backed and Structured Securities" (SSAP No. 26). Structured notes are different than the asset backed structured securities, which are accounted for under SSAP No. 43R, "Revised - Loan-Backed and Structured Securities" (SSAP No. 43R), as they lack either a trust or assets backing them. The disclosure below allows regulators to assess the volume of activity in structured notes and to determine whether additional accounting or reporting revisions, such as valuation and risk-based capital, are needed. To satisfy this request, the Company is required to separately identify structured notes, on a CUSIP basis and provide information by CUSIP for actual cost, fair value, book/adjusted carrying value, and whether the structured note is a mortgage-referenced security. The following sets forth the actual cost, fair value and carrying value of structured notes as of December 31, 2017:

| CUSIP Identification | Actual Cost | Fair Value | Book / Adjusted Carrying Value | Mortgage- Referenced Security (YES/NO) |
|-------------------------|---------------|---------------|-----------------------------------|---|

Note 6 - Joint Ventures, Partnerships and Limited Liability Companies

- a. The Company did not have any individual investment in joint ventures, partnerships or LLCs exceeding 10% of admitted assets for the years ended December 31, 2017 and 2016.
- b. The accumulated unrealized losses are realized when they are not expected to be recovered. The Company recognized \$3,450,599 in 2017 and \$4,990,115 in 2016 in impairments on its investments in joint ventures, partnerships and LLCs.

Refer to Note 1c. "Accounting policy" (14) for information on the Company's policy for determining OTTI.

Note 7 - Investment Income

- Accrued investment income consists primarily of interest and dividends. Interest is recognized on an accrual basis and dividends are recorded as earned on the ex-dividend date.
- b. The total amount of due and accrued investment income excluded from surplus was \$296,658 for the year ended December 31, 2017 and \$339,428 for the year ended December 31, 2016.

Note 8 - Derivative Instruments

a. The Company's principal derivative exposures to market risk are interest rate risk, which includes inflation and credit risk. Interest rate risk pertains to the change in fair value of the derivative instruments as a result of changes in market interest rates. The Company is exposed to credit-related losses in the event of nonperformance by counterparties to derivative financial instruments. The Company regularly monitors counterparty credit ratings, derivative positions, valuations and the value of collateral posted to ensure counterparties are credit-worthy and the concentration of exposure is minimized, and monitors its derivative credit exposure as part of its overall risk management program.

The Company enters derivative transactions through bilateral derivative agreements with counterparties, or through over the counter cleared derivatives with a counterparty and the use of a clearinghouse. To minimize credit risk for bilateral transactions, the Company and its counterparties generally enter into master netting agreements based on agreed upon requirements that outline the framework for how collateral is to be posted in the amount owed under each transaction, subject to certain minimums. For over the counter cleared derivative transactions between the Company and a counterparty, the parties enter into a series of master netting and other agreements that govern, among other things, clearing and collateral requirements. These transactions are cleared through a clearinghouse and each derivative counterparty is only exposed to the default risk of the clearinghouse. Certain interest rate swaps and credit default swaps are considered cleared transactions. These cleared transactions require initial and daily variation margin collateral postings. These agreements allow for contracts in a positive position, in which amounts are due to the Company, to be offset by contracts in a negative position. This right of offset, combined with collateral obtained from counterparties, reduces the Company's credit exposure.

b. The Company uses derivative financial instruments in the normal course of business to manage risks, primarily to reduce currency, interest rate and duration imbalances determined in asset/liability analyses. The Company also uses a combination of derivatives and fixed income investments to create synthetic investments. These synthetic investments are created when they are economically more attractive than the actual instrument or when similar instruments are unavailable. Synthetic investments are created either to hedge and reduce the Company's credit exposure or to create an investment in a particular asset. The Company held synthetic investments with a notional amount of \$59,950,000 as of December 31, 2017 and \$63,400,000 as of December 31, 2016. Of these amounts, no

investments were considered replicated assets as of December 31, 2017 and as of December 31, 2016, as defined under statutory accounting practices as the result of pairing of a long derivative contract with cash instruments.

The Company's derivative strategy employs a variety of derivative financial instruments, including: interest rate, currency, equity, bond, and credit default swaps; options; forward contracts and financial futures. Investment risk is assessed on a portfolio basis and individual derivative financial instruments are not generally designated in hedging relationships; therefore, as allowed by statutory accounting practices, the Company intentionally has not applied hedge accounting.

Interest rate swaps are primarily used to more closely match the cash flows of assets and liabilities. Interest rate swaps are also used to mitigate changes in the value of assets anticipated to be purchased and other anticipated transactions and commitments. A net realized loss on closed contracts of \$871,952 and a net unrealized loss on the market-to-market of open contracts of \$11,778,413 were recorded for the year ended December 31, 2017. A net realized loss on closed contracts of \$3,302,003 and a net unrealized loss on the market-to-market of open contracts of \$31,199,392 were recorded for the year ended December 31, 2016.

The Company uses currency swaps for the purpose of managing currency exchange risks in its assets and liabilities.

The Company does not sell credit default swaps as a participant in the credit insurance market. The Company does, however, use credit default swaps as part of its investment management process. The Company buys credit default swaps as an efficient means to reduce credit exposure to particular issuers or sectors in the Company's investment portfolio. The Company sells credit default swaps in order to create synthetic investment positions that enhance the return on its investment portfolio by providing comparable exposure to fixed income securities that might not be available in the primary market. A net realized loss on closed contracts of \$41,613 and a net unrealized gain on the market-to-market of open contracts of \$79,674 was recorded for the year ended December 31, 2017. A net realized loss on closed contracts of \$118,195 and a net unrealized gain on the market-to-market of open contracts of \$184,642 was recorded for the year ended December 31, 2016.

Options grant the purchaser the right to buy or sell a security or enter a derivative transaction at a stated price within a stated period. The Company's option contracts have terms of up to 15 years. A swaption is an option to enter an interest rate swap to either receive or pay a fixed rate at a future date. The Company purchases these options for the purpose of managing interest rate risks in its assets and liabilities.

The Company utilizes certain other agreements including forward contracts and financial futures. Currency forwards are contracts in which the Company agrees with other parties to exchange specified amounts of identified currencies at a specified future date. Typically, the exchange rate is agreed upon at the time of the contract. In addition, the Company also uses "to be announced" forward contracts (TBAs) to hedge interest rate risk and participate in the mortgage-backed securities market in an efficient and cost effective way. Typically, the price is agreed upon at contract inception and payment is made at a specified future date. The Company usually does not purchase TBAs with settlement by the first possible delivery date and thus accounts for these TBAs as derivatives. TBAs that settle on the first possible delivery date are accounted for as bonds. The Company's futures contracts are exchange traded and have credit risk. Margin requirements are met with the deposit of securities. Futures contracts are generally settled with offsetting transactions. Forward contracts and financial futures are used by the Company to reduce exposures to various risks including interest rates and currency rates.

Net collateral pledged to the counterparties was \$119,807,740 as of December 31, 2017 and \$37,981,619 as of December 31, 2016. In the event of default, the full market value exposure at risk in a net gain position, net of offsets and collateral, was \$4,565,486 as of December 31, 2017 and \$14,379,781 as of December 31, 2016. The statutory net amount at risk, defined as net collateral pledged and statement values excluding accrued interest, was \$13,880,877 as of December 31, 2017 and \$18,959,997 as of December 31, 2016.

- c. The fair value of these contracts is included in invested assets and other liabilities. Changes in the fair value of these contracts, other than interest rate swaps associated with replicated assets, are recorded as unrealized gains or losses in surplus. Gains and losses realized on the termination, closing, or assignment of contracts are recorded as realized capital gains or losses. Amounts receivable and payable are accrued.
- d. No unrealized gains or losses recognized on derivatives were excluded from the assessment of effectiveness for the years ended December 31, 2017 or 2016, since the Company has decided not to apply hedge accounting. The Company uses portfolio hedging as a risk mitigation factor. The Company assesses the derivatives' effectiveness to hedge the sensitivity of the net asset and liability portfolio to interest and volatility movements in the context of the current market environment.
- e. The Company uses portfolio hedging as a risk mitigation factor, which does not qualify for hedge accounting.
- f. The Company does not account for derivatives as cash flow hedges of a forecasted transaction.

- Note 9 Income Taxes

 A. The Company provides for deferred income taxes based on an admissibility limitation of 15% of surplus and a three year reversal/realization period.
 - 1. The net DTA or net deferred tax liability (DTL) recognized in the Company's assets, liabilities and surplus is as follows:

| | | December 31, 2017 | | | | | | |
|------------|---|-------------------|--------------|-------------------|--------------|----|--------------|--|
| | | | Ordinary | | Capital | | Total | |

4. The ultimate realization of DTAs depends on the generation of future taxable income during the periods in which the temporary differences are deductible. Management considers the scheduled reversal of DTLs (including the impact of available carryback and carryforward periods), projected taxable income and tax-planning strategies in making this assessment. The impact of tax-planning strategies is as follows:

| | | | December 31, 2017 | | | | |

The change in net deferred income taxes is comprised of the following:

| | Years Ended December 31, | | | | |
|--|--------------------------|--------------|----|--------------|--|
| | _ | 2017 | | 2016 | |
| (1) Net DTA(L) | \$ | (62,707,708) | \$ | 27,219,114 | |
| Less: Items not recorded in the change in net deferred income taxes: | | - | | - | |
| (2) Tax-effect of unrealized gains/(losses) | | 11,181,536 | | (18,139,755) | |
| (3) Tax-effect of changes from acquisitions/transfers | | | | | |
| (4) Change in net deferred income taxes | \$ | (51,526,172) | \$ | 9,079,359 | |

D. The components of federal and foreign income tax on operating items are recorded on the Summary of Operations and Capital and Surplus Account and are different from that which would be obtained by applying the prevailing federal income tax rate to operating income before taxes. The significant items causing this difference are as follows:

| | | Years Ended December 31, | | | | |
|--|---|--------------------------|--|----|--|--|
| | | | 2017 | | 2016 | |
| (1) (2) (3) (4) (5) (6) (8) (9) | Provision computed at statutory rate Nonadmitted assets Foreign governmental income taxes Expense items Investment items Tax credits Corporate rate reduction Other | \$ | 48,155,844 (1,257,118) 436,599 2,294 (7,956,520) (681,441) 51,967,661 339,232 | \$ | 29,961,590 2,856,721 736,956 2,961 (11,088,273) (1,221,017) - (769,569) | |
| | Total statutory income tax expense | \$ | 91,006,551 | \$ | 20,479,369 | |
| ٠, | Federal and foreign income tax expense Change in net deferred income taxes | \$ | 39,480,379 51,526,172 | \$ | 29,558,728 (9,079,359) | |
| | Total statutory income tax expense | \$ | 91,006,551 | \$ | 20,479,369 | |

- E. (1) As of December 31, 2017, the Company had no net operating or capital loss carryforwards to include in deferred income taxes. The Company has no total tax credit carryforwards included in deferred taxes.
 - (2) The Company paid federal income taxes of \$26,812,351 in 2017 and \$36,006,306 in 2016.
 - (3) As of December 31, 2017 and 2016, the Company did not recognize any protective deposits as admitted assets.
- F. (1) The Company is included in a consolidated United States (U.S.) federal income tax return with its parent, Massachusetts Mutual Life Insurance Company (MassMutual), a mutual life insurance company domiciled in the Commonwealth of Massachusetts, and MassMutual's eligible U.S. subsidiaries. The Company also files income tax returns in various states and foreign jurisdictions.
 - (2) The Company, MassMutual, and MassMutual's eligible subsidiaries and certain affiliates (the Parties) have executed and are subject to a written tax allocation agreement (the Agreement). The Agreement sets forth the manner in which the total combined federal income tax is allocated among the Parties. The Agreement provides the Company with the enforceable right to recoup federal income taxes paid in prior years in the event of future net losses, which it may incur. Further, the Agreement provides the Company with the enforceable right to utilize its net losses carried forward as an offset to future net income subject to federal income taxes.
- G. (1) Companies are generally required to disclose unrecognized tax benefits, which are the tax effect of positions taken on their tax returns that may be challenged by the various taxing authorities, in order to provide users of financial statements more information regarding potential liabilities. The Company recognizes tax benefits and related reserves in accordance with existing SAP for liabilities, contingencies and impairments of assets.
 - (2) On December 22, 2017, the president signed into law H.R. I/Public Law 115-97 commonly known as the Tax Cuts and Jobs Act (the "Act"). The Act contains several key provisions that have significant financial statement effects. These provisions required the remeasurement of deferred tax assets and liabilities, and changed the method of computing deductions for life insurance reserves.
 - (3) The Act required the remeasurement of deferred taxes, as it reduces the corporate tax rate to 21 percent, effective January 1, 2018. Accordingly, the Company remeasured its net admitted deferred taxes as of the enactment date and recognized a decrease in surplus of \$17,119,894 in 2017. Of the \$17,119,894 net decrease, \$51,967,661 was reflected in the change in other deferred income taxes, \$1,694,112 was reflected in the change in net unrealized foreign exchange capital gains (losses), \$10,677,772 was reflected in the change in net unrealized capital gains (losses), offset by increases of \$47,219,652 reflected in change in non-admitted assets.
 - (4) The Act revised the computation of life insurance tax reserves to be the greater of the net surrender value of a contract and 92.81 percent of statutory reserves. The revised reserve computation is effective for taxable years beginning after December 31, 2017. A transition rule requires life insurers to spread the difference between the prior year end reserves computed on the old basis and those computed on the new basis over eight years as either income or a deduction. The Company has recorded an estimated provision for this change by recognizing a net \$7,560,000 decrease in its deferred tax asset, offset by a corresponding decrease in its deferred tax liability that will reverse over the eight year transition period. The Company is in the process of modifying its tax reserve systems to incorporate the new method. The Company will update the provisional amount when it completes its system modifications during the measurement period, but no later than December 2018.

- (5) The Internal Revenue Service (IRS) has completed its examination of the tax returns filed for years 2013 and prior. The IRS commenced its exam of years 2014-2015 in September 2017. The adjustments resulting from the examinations are not expected to materially affect the position or liquidity of the Company.
- (6) With respect to the admitted DTAs calculation, effective January 1, 2018, the Act eliminates the ability to carryback net operating losses, therefore the amount of adjusted gross DTA admitted based on recoverable federal taxes is limited only to capital DTAs.

Note 10 - Information Concerning Parent, Subsidiaries and Affiliates

- The Company is a wholly owned subsidiary of MassMutual, a mutual insurance company domiciled in the Commonwealth of Massachusetts.
- b-c. The Company provides revolving credit facilities to MassMutual Asset Finance, LLC (MMAF) and Jefferies Finance LLC. During 2017, MMAF borrowed \$103,646,416 and repaid \$110,000,000 under the MMAF facility. During 2017, Jefferies Finance LLC borrowed \$264,290,332 and repaid \$241,880,332 under the Jefferies Finance LLC facility. Refer to Note 14 "Contingencies, Liabilities and Assessments" for additional information regarding the credit facilities. See also Schedule Y for subsidiaries and controlled affiliates (SCAs) activity.
- d. The Company reported \$301,243 as amounts due from subsidiaries and affiliates as of December 31, 2017 and \$273,263 as of December 31, 2016. The Company reported \$35,097,141 as amounts due to subsidiaries and affiliates as of December 31, 2017 and \$19,622,615 as of December 31, 2016. Terms require settlement of these amounts within 30 to 90 days.
- e. The Company has a stop-loss agreement with MassMutual under which the Company cedes claims which, in aggregate, exceed 1.5% of the covered volume for any year, with maximum coverage of \$25,000,000 above the aggregate limit. The aggregate limit was \$83,575,434 in 2017 and \$94,524,450 in 2016 and was not exceeded in either year.

The Company has coinsurance agreements with MassMutual, where the Company cedes substantially all of the premium on certain universal life policies. In return, MassMutual pays to the Company a stipulated expense allowance and death and surrender benefits. MassMutual holds the assets and related reserves for payment of future benefits on the ceded policies.

The net amounts outstanding and due from MassMutual for the various reinsurance agreements were \$15,833,069 as of December 31, 2017 and \$38,451,450 as of December 31, 2016. These outstanding balances are due and payable with terms ranging from monthly to annually, depending on the agreement in effect.

The following summarizes reinsurance transactions between the Company and MassMutual:

| | Years Ended December 31, | | | |
|--|--------------------------|--------------|----|--------------|
| | 2017 | | | 2016 |
| | | | | |
| Premium income (expense) ceded, related to: | | | | |
| Stop-loss agreements | \$ | (549,026) | \$ | (663,156) |
| Coinsurance agreements | | (45,400,173) | | (45,044,405) |
| Expense allowances on reinsurance ceded, included in fees and other income (expense) related to: | | | | |
| Coinsurance agreements | | 13,821,692 | | 14,935,995 |
| Policyholders' benefits ceded, related to: | | | | |
| Coinsurance agreements | | 116,756,466 | | 95,699,191 |
| Experience refunds received, related to: | | | | |
| Stop-loss agreements | | 137,257 | | 165,787 |

f. Pursuant to a management agreement, MassMutual, for a fee, furnishes to the Company, as requested, operating facilities, human resources, computer software development and managerial services. Investment and administrative services are also provided to the Company pursuant to a management services agreement with MassMutual. While management believes that these fees are calculated on a reasonable basis, these fees may not necessarily be indicative of the costs that would have been incurred on a stand-alone basis.

The following summarizes the transactions between the Company and related parties:

| | Years Ended December 31, | | | | |
|---|--------------------------|----|------------|--|--|
| | 2017 201 | | | | |
| Fee income: | | | | | |
| Recordkeeping and other services | \$ 1,523,110 | \$ | 1,500,000 | | |
| Fee expense: | | | | | |
| Management and service contracts and cost-sharing | | | | | |
| arrangements | 77,214,806 | | 60,208,564 | | |

The Company and its subsidiary, MML Bay State, participate in variable annuity exchange programs with its parent, MassMutual, where certain variable annuity contract holders of either company can make nontaxable exchanges of their contracts for enhanced variable annuity contracts of the other company. The Company recorded premium income of \$6,566,063 in 2017 and \$29,633 in 2016, related to these exchange programs. The Company recorded surrender benefits of \$275,000 in 2017 and \$289,147 in 2016, related to these exchange programs. The Company has an agreement with MassMutual to compensate them or to be compensated for the lost revenue associated with the exchange of contracts that are within the surrender charge period. As a result of these exchanges, the Company did not receive any net commissions for the years ended December 31, 2017 or 2016.

- g. All outstanding shares of the Company were owned by its parent.
- h. The Company does not have an investment in its parent.

- i. As of December 31, 2017, the Company did not have an investment in SCAs exceeding 10% of admitted assets.
- j. In 2017, the Company did not have impairment write-downs on its investments in affiliated bonds. The Company recognized \$334,222 in impairment write-downs on its investments in affiliated joint ventures, including partnerships and LLCs of SCAs. OTTI were determined based on internally developed models.

In 2016, the Company recognized \$5,497 in impairment write-downs on its investments in affiliated bonds. The Company recognized \$1,451,990 in impairment write-downs on its investments in affiliated joint ventures, including partnerships and LLCs of SCAs. OTTI were determined based on internally developed models.

In 2017 and 2016, the Company did not have any impairment write-downs on its investments in common stock of affiliates.

- k. The Company has no foreign insurance subsidiary whose value is calculated by adjusting annuity GAAP account value reserves using the Commissioners' Annuity Reserve Valuation Method and the related Actuarial Guidelines.
- I. The Company does not hold an investment in a downstream noninsurance holding company.
- m. The Company does not have investments in foreign or noninsurance SCAs.
- n. The Company does not have any insurance SCAs for which the audited statutory equity reflects a departure from NAIC statutory accounting practices.

Note 11 - Debt

a. The Company did not have any capital notes or liability for borrowed money as of December 31, 2017 or 2016.

The Company did not have any debt that was considered to be extinguished by in-substance defeasance.

The Company did not set aside assets after the effective date of this statement solely for satisfying debt obligations.

b. The Company is not a member of the Federal Home Loan Bank (FHLB) therefore it has no FHLB funding agreements.

Note 12 – Retirement Plans, Deferred Compensation, Postemployment Benefits and Compensated Absences and Other Postretirement Benefit Plans

- a. The Company did not have any defined benefit pension plans for which the reporting entity is directly liable.
- b. The Company did not have any pension plans for which the reporting entity is directly liable.
- c. The Company did not have any pension plans for which the reporting entity is directly liable.
- d. The Company did not have any pension plans for which the reporting entity is directly liable.
- e. The Company did not have any defined contribution plans.
- f. The Company did not have multi-employer plans.
- g. Consolidated/Holding Company plans:
 - MassMutual charges allocated expenses to the Company based on relative weighted commissions for agents and time studies of its employees. The Company recorded and expense of \$6,465,187 for the year ended December 31, 2017 and \$5,773,739 for the year ended December 31, 2016 for these plans.
- h. The Company does not accrue for postemployment benefits and compensated absences since it does not have any employees.
- i. The Company did not have any plans under the Medicare Modernization Act.

Note 13 - Capital and Surplus, Shareholders' Dividend Restrictions and Quasi-Reorganizations

- (1) The Company had 50,000 shares of common stock authorized and 12,500 shares issued and outstanding as of December 31, 2017. The par value of the common stock is \$200 per share.
- (2) The Company did not have any preferred stock outstanding.
- (3) Without the prior approval of the Insurance Commissioner of the State of Connecticut (the Commissioner), total dividends paid to the Company's shareholder in a twelve month period are limited to the greater of (i) 10% of the Company's surplus as of December 31 of the preceding year or (ii) the net gain from operations for the twelve month period ending on December 31 of the preceding year; each case is determined using statutory accounting policies. In addition, the prior approval of the Commissioner is required if any dividend or distribution exceeds the Company's earned surplus. Under these regulations, \$157,315,989 of shareholder's equity is available for distribution to the shareholder in 2018 without prior regulatory approval.
- (4) The Company did not pay a dividend to MassMutual in 2017 or 2016. The Company did not receive a dividend from MML Bay State in 2017 or 2016.
- (5) Within the limits of (3) above, there are no restrictions placed on the portion of Company profits that may be paid as ordinary dividends to the stockholder.
- (6) There are no restrictions on unassigned surplus funds.
- (7) The Company did not make any advances to surplus.
- (8) The Company did not have any stock held for special purposes.
- (9) The Company does not have any special surplus funds.
- (10) The portion of unassigned funds (surplus) represented by net unrealized gains and losses (cumulative, net of deferred tax) was \$81,765,957 as of December 31, 2017 and \$87,707,582 as of December 31, 2016.
- (11) The Company did not have any surplus debentures or similar obligations.
- (12) There were no restatements due to prior quasi-reorganizations.

(13) There were no quasi-reorganizations in the prior ten years.

Note 14 - Liabilities, Contingencies and Assessments

a. Contingent commitments:

The Company approved financing of \$246,125,000 as of December 31, 2017 for MMAF that can be used to finance ongoing asset purchases and refinance existing Company provided lines of credit. Borrowings under the facility with the Company were \$184,903,337 as of December 31, 2017 and \$191,256,921 as of December 31, 2016. Interest expense for these borrowings was \$4,243,063 as of December 31, 2017 and \$3,637,539 as of December 31, 2016. The unfunded amount of the facility, totaling \$61,221,663 as of December 31, 2017, is included in private placements in the table below. The interest of this facility adjusts monthly based on the 30-day LIBOR.

The Company approved financing of \$25,000,000 as of December 31, 2017, for Jefferies Finance LLC that can be used to finance ongoing asset purchases and refinance existing Company provided lines of credit. The were no outstanding borrowings under the facility as of December 31, 2017 and December 31, 2016 and all outstanding interest has been paid. The total unfunded amount of the facility was \$25,000,000 as of December 31, 2017. The interest of this facility is calculated based on a full pass through of interest accrued on the underlying loans purchased.

In the normal course of business, the Company enters into commitments to purchase certain investments. The majority of these commitments have funding periods that extend between one and five years. The Company is not required to fund commitments once the commitment period expires.

As of December 31, 2017, the Company had the following commitments:

| | 2018 | 2019 | 2020 | 2021 | 2022 | Thereafter | Total |
|--------------------|---------------|---------------|----------------|--------------|---------------|---------------|----------------|
| Private placements | \$ 17,334,341 | \$ 136,800 | \$ 83,258,135 | \$ 716,467 | \$ 2,598,111 | \$ 16,944,179 | \$ 120,988,033 |
| Mortgage loans | 6,690,767 | 4,049,733 | 28,045,025 | 1,455,556 | 448,598 | 7,751,659 | 48,441,338 |
| Partnerships and | | | | | | | |
| LLCs | 14,601,549 | 10,127,611 | 30,778,557 | 5,959,589 | 17,172,962 | 17,609,256 | 96,249,524 |
| LIHTCs (including | | | | | | | |
| equity | | | | | | | |
| contributions) | | 614 | - | - | - | - | 614 |
| Total | \$ 38,626,657 | \$ 14,314,758 | \$ 142,081,717 | \$ 8,131,612 | \$ 20,219,671 | \$ 42,305,094 | \$ 265,679,509 |

b. Assessments:

The Company is subject to insurance guaranty fund laws in the states in which it does business. These laws assess insurance companies' amounts to be used to pay benefits to policyholders and policy claimants of insolvent insurance companies. Many states allow these assessments to be credited against future premium taxes. The Company believes such assessments in excess of amounts accrued will not materially impact its financial position, results of operations or liquidity.

c. Gain contingencies:

No material gain contingencies were realized subsequent to December 31, 2017 through the filing date.

- The Company did not have any claims related to extra contractual obligations in 2017.
- e. The Company has no joint and several liabilities.

f. All other contingencies:

In the normal course of business, the Company is involved in disputes, litigation and governmental or regulatory inquiries, administrative proceedings, examinations and investigations, both pending and threatened. These matters, if resolved adversely against the Company or settled, may result in monetary damages, fines and penalties or require changes in the Company's business practices. The resolution or settlement of these matters is inherently difficult to predict. Based upon the Company's assessment of these pending matters, the Company does not believe that the amount of any judgment, settlement or other action arising from any pending matter is likely to have a material adverse effect on the statement of financial position. However, an adverse outcome in certain matters below could have a material adverse effect on the consolidated results of operations for the period in which such matter is resolved, or an accrual is determined to be required, on the financial statement financial position, or on our reputation.

The Company evaluates the need for accruals of loss contingencies for each matter. When a liability for a matter is probable and can be estimated, the Company accrues an estimate of the loss and any related insurance recoveries, if any. An accrual is subject to subsequent adjustment as a result of additional information and other developments. The resolution of matters are inherently difficult to predict, especially in the early stages of matter. Even if a loss is probable, due to many complex factors, such as speed of discovery and the timing of court decisions or rulings, a loss or range of loss may not be reasonably estimated until the later stages of the matter. For matters where a loss is material and it is either probable or reasonably possible then it is disclosed. For matters where a loss may be reasonably possible, but not probable, or is probable but not reasonably estimated, no accrual is established, but the matter, if material, is disclosed. The Company is not able to provide a reasonable estimate of the aggregate range of any reasonably possible losses related to these matters.

Note 15 - Leases

The Company did not have any lease obligations.

Note 16 - Information About Financial Instruments With Off-Balance Sheet Risk and Financial Instruments With Concentrations of **Credit Risk**

The notional amounts of the company's financial instruments with off-balance sheet risk are as follows: (1)

| | | December 31, | | | | | | | |
|----|---------|------------------|------------------|------------------|------------------|--|--|--|--|
| | | 2017 | 2016 | 2017 | 2016 | | | | |
| | | As | sets | Liab | ilities | | | | |
| | | | | | | | | | |
| a. | Swaps | \$ 7,945,853,957 | \$ 8,053,194,220 | \$ 4,899,161,838 | \$ 6,020,129,929 | | | | |
| b. | Futures | 450,001,850 | 450,003,100 | - | - | | | | |
| C. | Options | 208,775,454 | 221,250,000 | 26,267,988 | <u>-</u> | | | | |
| d. | Total | \$ 8,604,631,261 | \$ 8,724,447,320 | \$ 4,925,429,826 | \$ 6,020,129,929 | | | | |

See Schedule DB of the Company's Annual Statement for additional detail.

- (2) See Note 8 "Derivative Instruments" for a discussion of the credit and market risk of derivative financial instruments, and the cash requirements and accounting policies related to those instruments.
- (3) See Note 8 "Derivative Instruments" for a discussion of the amount of accounting losses the Company would incur if any party to the financial instrument failed completely to perform according to terms of the contract and the collateral due proved to be of no value to the Company.
- (4) See Note 8 "Derivative Instruments" for a discussion of the Company's policy of requiring collateral to support financial instruments subject to credit risk, information about the Company's access to that collateral and the nature and description of the collateral supporting those financial instruments.

Note 17 - Sale, Transfer and Servicing of Financial Assets and Extinguishments of Liabilities

- During 2017 and 2016, the Company did not transfer any receivables that were reported as sales.
- Transfer and Servicing of Financial Assets:
 - The Company did not participate in securities lending as of December 31, 2017 or 2016.
 - (2) The Company did not have any servicing assets or liabilities in 2017 or 2016.
 - (3)The Company did not have any servicing assets or liabilities in 2017 or 2016.
 - (4)The Company did not have interests that continue to be held by a transferor in securitized financial assets in 2017 or 2016.
 - The Company did not have any transfers of financial assets accounted for as secured borrowing in 2017 or 2016.
 - (6)The Company did not have any transfers of receivables with recourse in 2017 or 2016.
 - See Note 5e1 "Repurchase Agreements". (7)
- Wash sales:
 - In the course of the Company's investment management activities, securities may be sold and reacquired within 30 days of (1) the sale date to enhance the Company's yield on its investment portfolio.
 - The Company did not sell any securities with the NAIC Designation 3 or below for the year ended December 31, 2017 or 2016, (2)that were reacquired within 30 days of the sale date.

Note 18 - Gain or Loss to the Reporting Entity from Uninsured Plans and the Uninsured Portion of Partially Insured Plans

The Company did not write any accident and health plans. Therefore, the Company did not have any uninsured accident and health

Note 19 – Direct Premium Written/Produced By Managing General Agents/Third Party Administrators

The Company did not have any premium written through managing general agents or third party administrators.

Note 20 - Fair Value Measurements

- Fair value is defined as the price that would be received from selling an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. The authoritative guidance around fair value establishes a measurement framework that includes a hierarchy used to classify the inputs used in measuring fair value. The hierarchy prioritizes the inputs to valuation techniques into three levels. Each level reflects a unique description of the inputs that are significant to the fair value measurements. The levels of the fair value hierarchy are as follows:
 - Level 1 Observable inputs in the form of quoted prices for identical instruments in active markets.
 - Level 2 Observable inputs other than Level 1 prices, such as quoted prices for similar assets or liabilities, quoted prices in markets that are not active or other inputs that are observable or can be derived from observable market data for substantially the full term of
 - Level 3 One or more unobservable inputs that are supported by little or no market activity and are significant to the fair value of the assets or liabilities. Level 3 assets and liabilities include financial instruments whose value is determined using internal models, as well as instruments for which the determination of fair value requires significant management judgment or estimation.

When available, the Company generally uses unadjusted quoted market prices from independent sources to determine the fair value of investments, and classifies such items within Level 1 of the fair value hierarchy. If quoted prices are not available, prices are derived from observable market data for similar assets in an active market or obtained directly from brokers for identical assets traded in inactive markets. Investments that are priced using these inputs are classified within Level 2 of the fair value hierarchy. When some of the necessary observable inputs are unavailable, fair value is based upon internally developed models. These models use inputs not directly observable or correlated with observable market data. Typical inputs, which are integrated in the Company's internal discounted cash flow models and discounted earnings models include, but are not limited to, issuer spreads derived from internal credit ratings and benchmark yields such as the LIBOR, cash flow estimates and earnings before interest, taxes, depreciation and amortization estimates. Investments that are priced with such unobservable inputs are classified within Level 3 of the fair value hierarchy.

The Company has established and maintains policies and guidelines that govern its valuation methodologies and their consistent application. These policies and guidelines address the use of inputs, price source hierarchies and provide controls around the valuation processes. These controls include appropriate review and analysis of prices against market activity or indicators for reasonableness, approval of price source changes, price overrides, methodology changes and classification of fair value hierarchy levels. The valuation policies and guidelines are reviewed and updated as appropriate.

Annually, the Company reviews the primary pricing vendor to validate that the inputs used in that vendor's pricing process are deemed to be market observable as defined above. While the Company was not provided access to proprietary models of the vendor, the reviews have included on-site walk-throughs of the pricing process, methodologies and control procedures for each asset class and level for which prices are provided. The review also included an examination of the underlying inputs and assumptions for a sample of individual securities across asset classes. In addition, the Company and its pricing vendors have an established challenge process in place for all security valuations, which facilitates identification and resolution of prices that fall outside expected ranges. The Company believes that the prices received from the pricing vendors are representative of prices that would be received to sell the assets at the applicable measurement date (exit prices) and are classified appropriately in the hierarchy.

The fair value of individual annuity and supplementary contracts is determined using one of several methods based on the specific contract type. For short-term contracts, generally less than 30 days, the fair value is assumed to be the book value. For investment-type contracts, the fair value is determined by calculating the present value of future cash flows discounted at current market interest rates, the risk-free rate or a current pricing yield curve based on pricing assumptions using assets of a comparable corporate bond quality. Annuities are valued using cash flow projections from the Company's asset-liability management analysis.

(1) The following presents the Company's fair value hierarchy for assets and liabilities that are carried at fair value:

| | December 31, 2017 | | | | | | |
|--|-------------------|---------|-------------|----|------------|-------|---------------|
| | Level 1 Level 2 | | Level 3 | | | Total | |

⁽¹⁾ Level 3 transfers include assets that are consistently carried at fair value but have had a level change, are no longer carried at fair value, or have just begun to be carried at fair value, such as assets with no level changes but a change in the lower of cost or market carrying basis.

- (3) The Company reviews the fair value hierarchy classifications at each reporting period. Overall, reclassifications between levels occur when there are changes in the observability of inputs and market activity used in the valuation of a financial asset or liability. Such reclassifications are reported as transfers between levels at the beginning fair value for the reporting period in which the changes occur. Given the types of assets classified as Level 1 (primarily equity securities and mutual fund investments), transfers between Level 1 and Level 2 measurement categories are expected to be infrequent. Transfers into and out of Level 3 are summarized in the schedule of changes in Level 3 assets and liabilities.
- (4) Valuation Techniques and Inputs

The Company determines the fair value of its investments using primarily the market approach or the income approach. The use of quoted prices for identical assets and matrix pricing or other similar techniques are examples of market approaches, while the use of discounted cash flow methodologies is an example of the income approach. The Company attempts to maximize the use of observable inputs and minimize the use of unobservable inputs in selecting whether the market or the income approach is used.

A description of the significant valuation techniques and inputs to the determination of estimated fair value for the more significant asset and liability classes measured at fair value on a recurring basis and categorized within Level 2 and Level 3 of the fair value hierarchy is as follows:

Separate account assets - These assets primarily include bonds (industrial and miscellaneous; U.S. government and agencies) and derivatives. Their fair values are determined as follows:

Bonds (Industrial and miscellaneous) - These securities are principally valued using the market or the income approaches. Level 2 valuations are based primarily on quoted prices in markets that are not active, broker quotes, matrix pricing or other similar techniques that use standard market observable inputs such as benchmark yields, spreads versus benchmark yields, new issuances, issuer ratings, duration, and trades of identical or comparable securities. Privately placed securities are valued using discounted cash flow models using standard market observable inputs, and inputs derived from, or corroborated by, market observable data including market yield curve, duration, call provisions, observable prices and spreads for similar publicly traded or privately traded issuances that incorporate the credit quality and industry sector of the issuer. This level also includes securities priced by independent pricing services that use observable inputs. Valuations based on matrix pricing or other similar techniques that utilize significant unobservable inputs or inputs that cannot be derived principally from, or corroborated by, observable market data, including adjustments for illiquidity, delta spread adjustments or spreads to reflect industry trends or specific credit—related issues are classified as Level 3. In addition, inputs including quoted prices for identical or similar securities that are less liquid and based on lower levels of trading activity than securities classified in Level 2 are classified as Level 3.

Bonds (U.S. government and agencies) - These securities are principally valued using the market approach. Level 2 valuations are based primarily on quoted prices in markets that are not active, or using matrix pricing or other similar techniques using standard market observable inputs such as the benchmark U.S. Treasury yield curve, the spreads versus the U.S. Treasury yield curve for the identical security and comparable securities that are actively traded.

Derivative assets and liabilities - These financial instruments are primarily valued using the market approach. The estimated fair value of derivatives is based primarily on quotations obtained from counterparties and independent sources, such as quoted market values received from brokers. These quotations are compared to internally derived prices and a price challenge is lodged with the counterparties and an independent source when a significant difference cannot be explained by appropriate adjustments to the internal model. When quoted market values are not reliable or available, the value is based upon an internal valuation process using market observable inputs that other market participants would use. Significant inputs to the valuation of derivative financial instruments include overnight index swaps and LIBOR basis curves, interest rate volatility, swap yield curve, currency spot rates, cross currency basis curves and dividend yields. Due to the observability of the significant inputs to these fair value measurements, they are classified as Level 2.

The use of different assumptions or valuation methodologies may have a material impact on the estimated fair value amounts. For the periods presented, there were no significant changes to the Company's valuation techniques.

(5) Derivative assets and liabilities fair value disclosures on a gross basis are included in paragraph 1 above. Since there are no derivative assets or liabilities classified in Level 3, the reconciliation disclosures required under paragraphs 2 through 4 are not applicable.

- b. The Company provides additional fair value information in Note 21. "Other Items".
- c. The following presents a summary of the carrying values and fair values of the Company's financial instruments:

d. As of December 31, 2017 and December 31, 2016, the Company had no investments where it was not practicable to estimate fair value.

Note 21 - Other Items

- a. There were no unusual or infrequent items requiring disclosure.
- b. There were no troubled debt restructurings that occurred during the period for which the financial statements are presented.
- c. Other disclosures:

The Company had assets on deposit with government authorities or trustees, as required by law, in the amount of \$2,927,907 as of December 31, 2017 and \$2,724,280 as of December 31, 2016.

Business risks

The Company operates in a business environment subject to various risks and uncertainties. The principal risks include insurance and underwriting risks, investment and interest rate risks, currency exchange risk and credit risk.

Insurance and underwriting risks

The Company prices its products based on estimated benefit payments reflecting assumptions with respect to mortality, longevity, persistency, interest rates and other factors. If actual policy experience emerges that is significantly and adversely different from assumptions used in product pricing, the effect could be material to the profitability of the Company. The Company also reinsures certain life insurance and other long-term care insurance policies to mitigate the impact of its underwriting risk.

Investment and interest rate risks

The fair value, cash flows and earnings of investments can be influenced by a variety of factors including changes in interest rates, credit spreads, equity markets, portfolio asset allocation and general economic conditions. The Company employs a rigorous asset/liability management process to help mitigate the economic impacts of various investment risks, in particular interest rate risk. By effectively matching the market sensitivity of assets with the liabilities they support, the impact of interest rate changes is addressed, on an economic basis, as the change in the value of the asset is offset by a corresponding change in the value of the supported liability. The Company uses derivatives, such as interest rate swaps and swaptions, as well as synthetic assets to reduce interest rate and duration imbalances determined in asset/liability analyses.

The levels of U.S. interest rates are influenced by U.S. monetary policies and by the relative attractiveness of U.S. markets to investors versus other global markets. As interest rates increase, certain debt securities may experience amortization or prepayment speeds that are slower than those assumed at purchase, impacting the expected maturity of these securities and the ability to reinvest the proceeds at the higher yields. Rising interest rates may also result in a decrease in the fair value of the investment portfolio. As interest rates decline, certain debt securities may experience accelerated amortization and prepayment speeds than what was assumed at purchase. During such periods, the Company is at risk of lower net investment income as it may not be able to reinvest the proceeds at comparable yields. Declining interest rates may also increase the fair value of the investment portfolio.

Interest rates also have an impact on the Company's products with guaranteed minimum payouts and on interest credited to account holders. As interest rates decrease, investment spreads may contract as crediting rates approach minimum guarantees, resulting in an increased liability.

⁽¹⁾ Common stock - subsidiary and affiliates does not include MML Bay State, which had a statutory carrying value of \$288,294,439.

In periods of increasing interest rates, policy loans, surrenders and withdrawals may increase as policyholders seek investments with higher perceived returns. This could result in cash outflows requiring the Company to sell invested assets at a time when the prices of those assets are adversely affected by the increase in market interest rates, which could cause the Company to realize investment losses.

Currency exchange risk

The Company has currency risk due to its non-U.S. dollar investments. The Company mitigates currency risk through the use of cross-currency swaps and forward contracts. Cross-currency swaps are used to minimize currency risk for certain non-U.S. dollar assets through a pre-specified exchange of interest and principal. Forward contracts are used to hedge movements in exchange rates.

Credit and other market risks

The Company manages its investments to limit credit and other market risks by diversifying its portfolio among various security types and industry sectors as well as purchasing credit default swaps to transfer some of the risk.

Stressed conditions, volatility and disruptions in global capital markets or in particular markets or financial asset classes can have an adverse effect on the Company, in part because the Company has a large investment portfolio and assets supporting the Company's insurance liabilities are sensitive to changing market factors. Global market factors, including interest rates, credit spread quality, equity prices, real estate markets, foreign currency exchange rates, consumer spending, business investment, government spending, the volatility and strength of the capital markets, deflation and inflation, all affect the business and economic environment and, ultimately, the profitability of the Company's business. Disruptions in one market or asset class can also spread to other markets or asset classes. Upheavals in the financial markets can also affect the Company's business through their effects on general levels of economic activity, employment and customer behavior.

Significant volatility in the financial markets, and government actions taken in response, may exacerbate some of the risks the Company faces. The Company holds investments in energy and certain other commodity sectors, which have experienced similar overall market volatility and declines. With the continued weaker economic outlook in these sectors, there may be an increase in reported default rates or potential downgrades to the ratings of companies exposed to these sectors. In addition, concerns over the solvency of certain countries and sovereignties and the entities that have significant exposure to their debt have created market volatility. This volatility may continue to affect the performance of various asset classes until there is an ultimate resolution of the sovereign debt related concerns.

The CMBS, RMBS and leveraged loan sectors are sensitive to evolving conditions that can impair the cash flows realized by investors and is subject to uncertainty. Management's judgment regarding OTTI and estimated fair value depends upon the evolving investment sector and economic conditions. It can also be affected by the market liquidity, a lack of which can make it difficult to obtain accurate market prices for RMBS and other investments, including CMBS and leveraged loans. Any deterioration in economic fundamentals, especially related to the housing sector could affect management's judgment regarding OTTI.

The Company has investments in structured products exposed primarily to the credit risk of corporate bank loans, corporate bonds or credit default swap contracts referencing corporate credit risk. Most of these structured investments are backed by corporate loans and are commonly known as collateralized loan obligations that are classified as CDOs. The portfolios backing these investments are actively managed and diversified by industry and individual issuer concentrations. Due to the complex nature of CDOs and the reduced level of transparency to the underlying collateral pools for many market participants, the recovery in CDO valuations generally lags the overall recovery in the underlying assets. Management believes its scenario analysis approach, based primarily on actual collateral data and forward looking assumptions, does capture the credit and most other risks in each pool. However, in a rapidly changing economic environment, the credit and other risks in each collateral pool will be more volatile and actual credit performance of CDOs may differ from the Company's assumptions.

The Company continuously monitors its investments and assesses their liquidity and financial viability; however, the existence of the factors described above, as well as other market factors, could negatively impact the market value of the Company's investments. If the Company sells its investments prior to maturity or market recovery, these investments may yield a return that is less than the Company otherwise would have been able to realize.

Asset-based fees calculated as a percentage of the separate account assets are a source of revenue to the Company. Gains and losses in the investment markets may result in corresponding increases and decreases in the Company's separate account assets and related revenue.

Political Uncertainties

Political events, such as the ongoing volatility with respect to the European Union, may trigger or exacerbate the risk factors described above. Whether those underlying risk factors are driven by politics or not, the Company's dynamic approach to managing risks enables us to utilize the mitigating actions described above to attempt to reduce the potential impact of each underlying risk factor on the Company.

- d. The Company did not receive any business interruption recoveries in 2017.
- e. The Company did not have unused transferable or non-transferable state tax credits as of December 31, 2017.
- f. Subprime mortgage related risk exposure:

As of December 31, 2017 and 2016, the Company did not have any direct exposure through investments in subprime mortgage loans.

(1) Direct exposure through other investments

RMBS risk exposure

Portfolios of ABS, including RMBS and CMBS, are evaluated on a periodic basis using scenarios customized by collateral type. The Company performs sensitivity analysis on defaults as loan-to-values change, and on defaults as prepayments change using default curves under various scenarios. The Company combines scenario analysis with a monthly surveillance process in which it compares actual delinquencies and defaults to expectations established at the time securities are acquired as well as expectations considering current market conditions, and performs a statistical review to determine potential losses relative to credit support of troubled loan exposures on a transaction-by-transaction basis.

Management used a combination of external vendor prices, broker quotations and internal models for purposes of deriving fair value. Internal inputs used in the determination of fair value included estimates of prepayment speeds, default rates, discount rates and collateral values, among others. Structure characteristics and results of cash flow priority are also considered. Fair values resulting from internal models are those expected to be received in an orderly transaction between willing market participants at the financial statement date.

The Company holds certain investments backed by pools of residential mortgages. The majority of these investments are included in bonds. The mortgages in these pools have varying risk characteristics and are commonly categorized as being of

U.S. government agency, non-agency prime, Alt-A and subprime borrower quality. The Alt-A category includes option adjustable rate mortgages and the subprime category includes 'scratch and dent' or reperforming pools, high loan-to-value pools, and pools where the borrowers have very impaired credit but the average loan-to-value is low, typically 70% or below at origination. In identifying Alt-A and subprime exposure, management used a combination of qualitative and quantitative factors, including FICO scores and loan-to-value ratios.

Residential mortgage loan pools are homogeneous residential mortgage loans substantially backed by FHA and VA guarantees. The Company purchases seasoned loan pools, most of which are FHA insured or VA guaranteed. The Company does not originate any residential mortgages but invests in residential mortgage loan pools which may contain mortgages of subprime credit quality. As of December 31, 2017 and 2016, the Company did not have any direct subprime exposure through purchases of unsecuritized whole-loan pools.

- (2) The Company has no underwriting exposure to subprime mortgage risk through Mortgage Guaranty or Financial Guaranty insurance coverage.
- (3) The actual cost reduced by paydowns, carrying value, fair value and related gross realized losses from OTTI of the Company's investments with significant Alt-A and subprime exposure were as follows:

g. Retained asset accounts:

(1) The Company offers the use of retained asset accounts as one of the options available to beneficiaries. This option must be affirmatively elected and is not treated as a default. An unaffiliated third party provider services certain aspects of the retained asset accounts. Beneficiaries draw funds from retained asset accounts utilizing drafts. The Company funds those drafts through an unaffiliated bank. During the reporting year, the interest earned by beneficiaries was an annual effective rate of 0.25% and did not change within the reporting year. There is no fee charged to the beneficiary to establish this account. There are no maintenance or service fees. A \$12 stop payment fee, a \$10 insufficient funds fee and a \$2 duplicate draft fee will apply. Assets and liabilities relating to retained asset accounts remain with the Company and are reported within the Company's financial statements as assets and supplemental contracts without life contingencies. The assets and liabilities relating to retained asset accounts which were issued prior to March 2011 are reported within MassMutual's Retained Asset Account balances.

h. Insurance-linked securities:

The Company has not received any proceeds as the issuer, ceding insurer or counterparty of insurance-linked securities.

Note 22 - Events Subsequent

Management of the Company has evaluated subsequent events through February 16, 2018, the date the financial statements were available to be issued. No events have occurred subsequent to the date of the statement of financial position and before the date of evaluation that would require disclosure.

Note 23 - Reinsurance

. Ceded Reinsurance Report:

Section 1 - General Interrogatories:

- (1) The Company and its officers and directors do not own any portion of a nonaffiliated reinsurer.
- (2) The Company did not reinsure any policies with a company chartered in a country other than the U.S., excluding U.S. branches of these companies, which was owned in excess of 10% or controlled directly or indirectly by an insured, a beneficiary, a creditor or any other person not primarily engaged in the insurance business.

Section 2 - Ceded Reinsurance Report - Part A:

- (1) There are no reinsurance agreements in effect under which the reinsurer may unilaterally cancel any reinsurance for reasons other than for nonpayment of premium or other similar credits.
- (2) The Company has no reinsurance agreements in effect such that the amount of losses paid or accrued through the statement date may result in a payment to the reinsurer of amounts which, in aggregate and allowing for offset of mutual credits from other reinsurance agreements with the same reinsurer, exceed the total direct premium collected under the reinsured policies.

Section 3 - Ceded Reinsurance Report - Part B:

- (1) If all reinsurance agreements were terminated by either party as of December 31, 2017, the resulting reduction in surplus due to loss of reinsurance reserve credits, net of unearned premium, would be \$567,814,127, assuming no return of the assets (excluding assets in trust) backing these reserves from the reinsurer to the Company.
- (2) No new agreements have been executed or existing agreements amended, since January 1, 2017, to include policies or contracts that were in force or had existing reserves established by the Company as of the effective date of the agreement.

Effective December 31, 2016, the Company entered into a reinsurance agreement with an authorized third-party to reinsure approximately 100% of certain of the Company's inforce universal life policies. Under the terms of the agreement, the Company gave \$283,527,749 of consideration to the reinsurer. The universal life policies are reinsured on a coinsurance basis. Under the terms of the agreements, the Company will maintain responsibility for servicing the policies. The Company ceded premium of \$369,711,871 and policyholders' reserves of \$364,905,973 in the change in policyholders' reserves in the Statutory Statement of Operations and recorded a \$56,412,236 increase in the Statutory Statements of Changes in Surplus in conjunction with these agreements.

- b. The Company did not write off any reinsurance balances.
- c. The Company did not commute any ceded reinsurance.
- d. The Company did not reinsure any policies with a certified reinsurer whose rating was downgraded or status subject to revocation.
- e. The Company does not have reinsurance of variable annuity contracts with an affiliated captive reinsurer.
- f. The Company does not have reinsurance of variable annuity contracts with an affiliated captive reinsurer.
- g. Ceding entities that utilize captive reinsurers to assume reserves subject to the XXX/AXXX captive framework.
 - (1) Ceding reinsurers in which a risk-based capital shortfall exists per the risk-based capital XXX/AXXX captive reinsurance consolidated exhibit:

Note 24 - Retrospectively Rated Contracts and Contracts Subject to Redetermination

The Company does not issue group health insurance and therefore did not issue retrospectively rated contracts or contracts subject to redetermination.

Note 25 - Change in Incurred Losses and Loss Adjustment Expenses

There was no increase to reserves in 2017 for incurred losses and loss adjustment expenses attributable to insured events of prior years, which considered corrections of prior year errors.

Note 26 - Intercompany Pooling Arrangements

The Company did not have any intercompany pooling arrangements.

Note 27 - Structured Settlements

The Company did not enter into structured settlement agreements with other life insurers to resolve claims.

Note 28 - Health Care Receivables

The Company did not issue any business that would give rise to pharmaceutical rebates or risk sharing receivables.

Note 29 - Participating Policies

The Company did not issue participating policies.

Note 30 - Premium Deficiency Reserves

The Company did not have any liability for premium deficiency on accident and health contracts or property/casualty contracts.

Note 31 - Reserves for Life Contracts and Annuity Contracts

- (1) The Company waives deduction of deferred fractional premium at death and returns any portion of the final premium beyond the date of death. Reserves are computed using continuous functions to reflect these practices. Surrender values were not promised in excess of the legally computed reserves.
- (2) The Company charges a higher premium on certain contracts that cover substandard mortality risk. For these policies, the reserve calculations are based on a substandard mortality rate, which is a multiple of the standard mortality tables.
- (3) The Company had \$575,974,097 of insurance in force as of December 31, 2017 for which the gross premium was less than the net premium according to the standard valuation set by the Department. Deficiency reserves to cover this insurance totaled \$18,196,968 as of December 31, 2017 and were reported in Exhibit 5.
- (4) Tabular interest, tabular reserves less actual reserves released, and tabular cost for all life and annuity contracts and supplementary contracts involving life contingencies are determined in accordance with NAIC Annual Statement instructions. For tabular interest, term life products use a formula that applies a weighted average interest rate determined from a seriatim valuation file to the mean average reserves. Universal life, variable life, group life, annuity and supplemental contracts use a formula which applies a weighted average credited rate to the mean account value. For contracts without an account value, a weighted average statutory valuation rate is applied to the mean statutory reserve or accepted actuarial methods using applicable interest rates are applied.
- (5) Liabilities for investment-type contracts such as supplementary contracts not involving life contingencies are based on account value or accepted actuarial methods using applicable interest rates. Refer to Note 20 a. "Fair Value Measurement" for information on the Company's policy for determining fair value.
- (6) The details for other changes:

Note 34 - Separate Accounts

- a. Separate account activity:
 - (1) Separate accounts are segregated funds administered and invested by the Company, the performance of which primarily benefits the policyholders/contract holders with an interest in the separate accounts. Group and individual variable annuity, variable life and other insurance policyholders/contract holders select from among the separate accounts and sub-accounts made available by the Company. The separate accounts and sub-accounts are offered as investment options under certain insurance contracts or policies. The returns produced by separate account assets increase or decrease separate account reserves. Separate account assets consist principally of marketable securities reported at fair value. Separate account assets can only be used to satisfy separate account liabilities and are not available to satisfy the general obligations of the Company. Separate account administrative and investment advisory fees are included in miscellaneous income.

The separate account classification of all separate account products for the Company is supported by state statute Connecticut Laws Title 38a, Chapter 700b, Sections 38a-433 & 459.

(2) In accordance with the products recorded within the separate accounts, some are considered legally insulated whereas others are not legally insulated from the general account. The legal insulation of the separate account products prevents assets other than seed money or amounts in a supplemental account from being generally available to satisfy claims resulting from the general account.

As of December 31, 2017 and 2016, the Company's NAIC Separate Account Annual Statement included Separate Accounts with legally insulated products of \$1,877,854,722 and \$1,717,971,465, respectively. Assets backing products which are not legally insulated are available to satisfy general obligations of the Company. The assets backing legally insulated products from the general account as of December 31, 2017 are attributed to the following:

| | Separate Account Assets | | | | | |
|------------------------------------|-------------------------|---------------|----|-------------|---|--|
| | Legally | | | Not Legally | | |
| | Insulated | | | Insulated | | |
| Product/Transaction: | | | | | | |
| Individual Variable Annuity | \$ | 1,346,661,089 | \$ | | - | |
| Individual Variable Universal Life | | 531,169,494 | | | - | |
| Corporate-Owned Life Insurance | | 24,139 | | | - | |
| Total | \$ | 1,877,854,722 | \$ | | | |

(3) In accordance with the products/transactions recorded within the separate accounts, some separate account liabilities are guaranteed by the general account. Reserves for guarantees covering death benefits or minimum rates of return are held in the general account. If the investment proceeds are insufficient to cover the rate of return guaranteed for the product or the guaranteed death benefit, the policyholder proceeds will be remitted by the general account.

To compensate the general account for the risk taken, the separate accounts have paid risk charges as follows for the past five years:

| 2017 | \$ 69,536 |
|------|--------------|
| 2016 | 67,406 |
| 2015 | 78,132 |
| 2014 | 88,369 |
| 2013 | 90,735 |

For the year ended December 31, 2017, the general account of the Company had paid \$906,897 toward separate account guarantees. The total separate account guarantees paid by the general account for the preceding years ending December 31, 2016, 2015, 2014, and 2013 were \$869,735, \$1,137,678, \$577,764, and \$642,276, respectively.

The Company's separate account products are not classified differently under GAAP than under statutory accounting principles.

- (4) The Company does not engage in securities lending transactions within the separate accounts.
- b. General nature and characteristics of separate account business:

The Company has nonguaranteed separate accounts that are variable accounts where the benefit is determined by the performance and/or market value of the investments held in the separate account with incidental risk, notional expense and minimum death benefit guarantees.

Information regarding the separate accounts of the Company as of and for the year ended December 31,2017 is as follows:

| | | | | Nonindexed | | | |
|---------|---|----|-------|----------------------------------|-------------------------|----------------------|---------------------------------------|

 Provide the following information for all short-term and long-term bonds and all preferred stocks. Do not substitute amortized value or statement value for fair value.

| | 1 | 2 | 3 |
|-----------------------|----------------------|---------------|-------------------------|
| | | | Excess of Statement |
| | | | over Fair Value (-), or |
| | Statement (Admitted) | | Fair Value over |
| | Value | Fair Value | Statement (+) |
| 30.1 Bonds | 4,415,118,989 | 4,640,052,351 | 224,933,362 |
| 30.2 Preferred stocks | 26,560,290 | 27,833,568 | 1,273,278 |
| 30.3 Totals | 4,441,679,279 | 4,667,885,919 | 226,206,640 |

30.4 Describe the sources or methods utilized in determining the fair values:

The Fair Value of securities is obtained using quoted market prices when available. If not available, estimated fair value is based on values provided by other third-party organizations. If values provided by other third-party organizations are unavailable, fair value is estimated using internal models by discounting future cash flows using observable current market rates applicable to yield, credit quality and maturity of the investment or using quoted market values for comparable investments. Internal inputs used in the determination of fair value include estimated prepayment speeds, default rates, discount rates and collateral values, among others. Structure Characteristics and results of cash flow priority are also considered

| 31.1 | Was the rate used to calculate fair value determined by a broker or custodian for any of the securities in Schedule D? | Yes [| X 1 | No | [|
|------|--|-------|-----|----|---|

value for Schedule D:

32.2 If no, list exceptions:

At 12/31/2017, 41 issues for 31 issuers did not meet the filing requirements of the Purposes and Procedures Manual. The majority of these issues currently lack one or more of the following: Valid cusip/PPN, audited financials and/or executed legal documentation. Exceptions totaled \$33,144,149 or 0.74% of all assets.

GENERAL INTERROGATORIES

| 55. | a. Documentation necessary to permit a full credit analysis of the security does not exist. b. Issuer or obligor is current on all contracted interest and principal payments. c. The insurer has an actual expectation of ultimate payment of all contracted interest and principal. Has the reporting entity self-designated 5*GI securities? | · | Yes [X |] No [] |

⁹⁴ above) (L) Licensed or Chartered - Licensed Insurance Carrier or Domiciled RRG; (R) Registered - Non-domiciled RRGs; (Q) Qualified - Qualified or Accredited Reinsurer; (E) Eligible - Reporting Entities eligible or approved to write Surplus Lines in the state; (N) None of the above - Not allowed to write business in the state.

Explanation of basis of allocation by states, etc., of premiums and annuity considerations

Individual insurance premiums and annuity considerations - allocated to the states in which the policyholder resides (based on Company records when the premium is received). Group premiums - allocated consistent with the 500 lives rule.

⁽a) Insert the number of L responses except for Canada and Other Alien.

⁽b) Column 4 should balance with Exhibit 1, Lines 6.4, 10.4, and 16.4, Cols. 8, 9, 10, or with Schedule H, Part 1, Line 1, indicate which: Exhibit 1, Lines 6.4, 10.4, and 16.4, Cols. 8, 9, 10...

SUPPLEMENTAL EXHIBITS AND SCHEDULES INTERROGATORIES

The following supplemental reports are required to be filed as part of your statement filing unless specifically waived by the domiciliary state. However, in the event that your domiciliary state waives the filing requirement, your response of WAIVED to the specific interrogatory will be accepted in lieu of filing a "NONE" report and a bar code will be printed below. If the supplement is required of your company but is not being filed for whatever reason enter SEE EXPLANATION and provide an explanation following the interrogatory questions.

| question | - - | Responses |
|----------|---|-------------------|
| _ | MARCH FILING | VEC |
| 1. | Will the Supplemental Compensation Exhibit be filed with the state of domicile by March 1? | YES |
| 2. | Will the confidential Risk-based Capital Report be filed with the NAIC by March 1? | YES |
